Information
Resources

Welcome to the UTD FAQ! This is where you can find answers to the things about UTD you most often want to know. We invite you to search our database, either by category or by keyword. We suggest searching several times, using slight changes to your search criteria, if your first search doesn't provide the information you're looking for. If you still don't find your answers, you will have an opportunity to ask the question yourself!

Please note that, while several of our questions are related to computer issues, we don't have the ability to resolve true computer problems here. If you *are* having such a problem, you should contact the UTD Computing Help Desk at 972-883-2911, email assist@utdallas.edu.

Good luck and happy searching!
