### DESIGNED CURRICULUM

ART 3340 - The Art of Tinkering: Creating at the intersection of Art, Science and Technology

This course is a 'hands on' and 'minds on' bridge between the Arts and STEM

ARTS 1301/BIOL 1408 - The Art of Life: Team Taught Learning Community designed with Biology

Professor Brianna Day

This course combines art media and concepts with biology concepts and labs.

Students are exposed to cross disciplinary artists and scientists working in the field of BioArt.

---

### SELF DEVELOPED PROGRAMS

2015 - Valville Sculpture School

Developed as an independent school to offer my accumulated skills and knowledge to students seeking personalized instruction on specific projects.

2015 - Creativity Enhancement Workshop for Big Thought

Hands on workshop guiding middle school age children through an activity to activate creative thinking and reuse of waste materials.

2015 - Rubber Mold Making and Casting Workshops at Dallas Makerspace

Series of ongoing workshops and demonstrations sharing the diverse range of practical applications of the molding and casting process

2014 - Imagination Design Challenge for Dallas Children's Theater

activity to inform young people about conservation and creative reuse of waste materials

2012 - Creativity Enhancement Workshop for Wade College of Design

Hands on workshop guiding college students through an activity to activate creative thinking and reuse of waste materials.

2011 - Artist Process Workshop for Wade College of Design

Series of workshops that brought a group of design students into my studio practice that culminated in a group show featuring the sculptures that they designed and built.

---
