Industrial Hygiene

The Industrial Hygiene program focuses on anticipating, recognizing, evaluating, and controlling potential health and safety hazards and environmental factors that may affect the health, comfort, or productivity of the campus community. Industrial Hygiene also emphasizes identification of general safety hazards and the correction of factors that contribute to the incidence of accidental injury.

The following services are included in the UTD Industrial Hygiene Program:

- [Asbestos Oversight Program](#)
- [Chemical Fume Hoods](#)
- [Compressed Gas Safety](#)
- [DOT/IATA Training Program](#)
- [Electrostatic Discharge](#)
- [Food Sanitation Program](#)
- [Hazardous Communication](#)
- [Hazwoper Training](#)
- [Hearing Conservation](#)
- [Indoor Air Quality](#)
- [Lab Close Out Procedures](#)
- [Lab Relocation Guidelines](#)
- [Respiratory Protection](#)
