I. Student Access, Success, and Outcomes

Values

The University of Texas System is committed to providing opportunities for access to and success in high-quality, affordable higher education for students from a wide range of social, ethnic, cultural, and economic backgrounds.

Goals

- Attract, enroll, retain, and graduate promising undergraduate, graduate, and professional students who want to pursue general and professional educational experiences.
- Provide high-quality and demanding curricula and instruction that result in student learning and degree completion.
- Prepare students for employment and careers.

Priorities

 Attract, enroll, retain, educate, and graduate students who reflect the socio-cultural and ethnic composition of Texas.

System Overview

U. T. System Contributions to *Closing the Gaps* Goals for Participation, Success, and High-Priority Degree Fields

The State of Texas's *Closing the Gaps* master plan for higher education, developed by the Texas Higher Education Coordinating Board, provides clear and ambitious goals to improve students' participation and success and enhance the research and overall excellence of institutions. Updated projections indicate that an additional 630,000 postsecondary students will enter Texas colleges and universities by 2015. The U. T. System takes seriously its responsibility and role in helping to close these gaps, embedding this commitment in the U. T. System Board of Regents' long-range plan, *Service to Texas in the New Century*, and tracking progress through many of the measures identified in this accountability report.

Together, the U. T. System's nine universities and six health-related institutions are making a significant impact in many areas targeted in the *Closing the Gaps* plan and have more progress to achieve in some areas. With six universities designated as Hispanic-Serving Institutions – U. T. Brownsville, U. T. El Paso, U. T. Pan American, U. T. Permian Basin, U. T. San Antonio, and U. T. Health Science Center-San Antonio – the U. T. System plays a particularly significant role in the state and nation in serving Hispanic students.

Trends related to participation, success, and contributions to high-priority fields are derived from the Texas Higher Education Coordinating Board's annual report on *Closing the Gaps*. Additional detail on all topics is available from the source document, *Closing the Gaps by 2015: 2005 Progress Report* (Texas Higher Education Coordinating Board [THECB], July 2005; http://www.thecb.state.tx.us/reports/pdf/0870.pdf).

Progress toward Participation

Overall Enrollment

- As the table and graphs on the next page illustrate, 185,816 students were enrolled at U. T.
 System institutions in fall 2005. This represents 34.3 percent of all public university enrollments in the state.
- Between fall 2004 and fall 2005, overall enrollment at U. T. System institutions increased by nearly 2 percent. Although small, this growth rate exceeded the statewide trend where, overall, enrollments increased by less than one percent over this period.
- Enrollment in fall 2005 increased at every U. T. System academic institution except U. T. Arlington and U. T. Austin (which capped enrollments in fall 2003). U. T. Austin, U. T. Brownsville/TSC, U. T. Permian Basin, and U. T. Tyler have slightly exceeded their 2005 *Closing the Gaps* enrollment targets.
- Taken together, however, fall 2005 enrollments were 4,508 less than 2005 *Closing the Gaps* enrollment target for U. T. System academic institutions.
- Total fall 2005 enrollment of 10,970 in the U. T. System health-related institutions increased by 2.5 percent over fall 2004, and exceeded the 2005 Closing the Gaps enrollment targets by 775 students.
- Fall 2005 enrollment totals do not include those students displaced by Hurricane Katrina who enrolled in U. T. System institutions. Nearly one thousand visiting students enrolled in a U. T. System institution: 856 at academic institutions and 89 at health-related institutions.

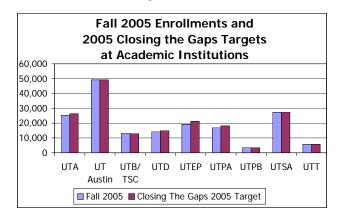

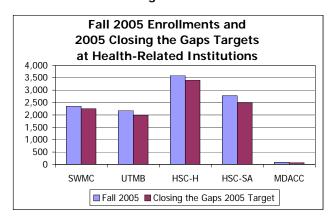

Figure I-2

Closing the Gaps Trends

■ The following tables and discussion, pp. I-5 to I-9, relate to trends discussed in more depth in the Texas Higher Education Coordinating Board's July 2005 progress report on *Closing the Gaps*.

Enrollment of Black and Hispanic Students

- Between fall 2000 and 2004, the number of Black students increased at all U. T. System academic institutions except U. T. Pan American where there was no change and three of five health-related institutions. The number of Hispanic students increased at 13 of the 14 U. T. System institutions with students.
- In this five-year period, the U. T. System as a whole has increased its contribution to the *Closing the Gaps* overall goals, as the number of Black students grew by 29 percent and the number of Hispanic students grew by 32 percent.
- See pp. I-14 and I-23 for additional detail and analysis.

^{*}M. D. Anderson enrolled undergraduate students for the first time in fall 2001.

Degrees Awarded and Degrees in High-Priority Fields

Each year, U. T. System institutions collectively produce tens of thousands of graduates with baccalaureate, graduate, and professional degrees who are prepared to join the state's workforce and contribute to the local and state economy.

Degrees awarded:

- Together, U. T. System institutions conferred 19,922 baccalaureate degrees in 2000 and 23,268 in 2004. In 2004, total degrees awarded by U. T. System institutions represented more than a quarter 28 percent of the statewide total of 84,573 baccalaureate degrees awarded.
- Between 2000 and 2004, production of doctoral degrees by U. T. System institutions grew from 1,065 to 1,084 – reversing a declining trend – and was 40 percent of the state total. Statewide, the downward trend was also reversed, increasing from 2,629 in 2000 to 2,729 in 2004.

^{*}M. D. Anderson provides joint graduate degrees with the HSC-Houston. It enrolled baccalaureate students for the first time in fall 2001.

¹ Decline in baccalaureate degrees was result of conversion of programs to Master's status.

Source: Texas Higher Education Coordinating Board

Undergraduate Degrees Awarded in High-Priority Fields

- The Texas Higher Education Coordinating Board defines high-priority technical fields to include engineering, computer science, mathematics, and physical science. High-priority health fields include nursing and allied health professions.
- In 2003-04, U. T. System academic institutions conferred a total of 3,303 baccalaureate degrees and certificates in high-priority technical fields. Since 1999-2000, the number increased at every U. T. System academic institution except U. T. Tyler (where there was a decrease of just two degrees). In some cases, the increases were notably large: nearly 300 additional degrees at U. T. Austin; 80 additional degrees at U. T. Brownsville/TSC; 70 more at U. T. Dallas; and nearly 100 additional degrees at U. T. San Antonio.
- In 2003-04, U. T. System academic institutions also awarded 1,289 baccalaureate degrees and certificates in high-priority health fields, a more modest increase over the number awarded in 1999-2000. The number increased by 73 at U. T. Brownsville/TSC and by 70 at U. T. El Paso.
- Producing larger numbers of science, engineering, and health profession graduates is a challenge for the state and the nation. The progress illustrated here is important. However, despite these noteworthy increases at most institutions, the U. T. System did not meet the THECB targets for technical or health certificates and degrees, which were adjusted upward in 2004.

^{**}Nursing and Allied Health

¹ Decline in baccalaureate degrees was result of conversion of programs to Master's status.

² In 03-04, U. T. Arlington also awarded 246 baccalaureate degrees in Information Systems, a field closely related to Computer Science.

Graduate-Level Education Degrees

- In addition, between 2000 and 2004, U. T. System institutions collectively have increased the number of graduate-level education degrees from 1,210 to 1,453.
- See data on numbers of education degrees on page I-70.

 $^{^{\}star}\text{M}.$ D. Anderson enrolled students for the first time in fall 2001.

- From 1999-2000 to 2003-04, the number of baccalaureate degrees and certificates awarded to Black and Hispanic students increased by over 30 percent at U. T. System academic institutions.
- Over this period at U. T. Arlington, the number of degrees awarded to Black and Hispanic students increased by 45 percent.
- At U. T. Dallas, the number of degrees awarded to Black students nearly doubled, from 68 to 132, and degrees awarded to Hispanic students increased by 54 percent.
- At U. T. Pan American, the number of degrees awarded to Black students, although small, increased by 125 percent; degrees to Hispanic students, by 32 percent.

¹ Allied Health baccalaureate program transitioned to Master's status.

- U. T. Permian Basin increased the number of degrees awarded to Hispanic students by 88 percent.
- At U. T. San Antonio, 65 percent more Black students received degrees in 2003-04 than in 1999-2000.
- At U. T. Tyler, 73 percent more Hispanic students received degrees in 2003-04 than in 1999-2000, (a comparatively small number).
- U. T. System health-related institutions enroll many fewer undergraduates. Overall, between 1999-2000 and 2003-04, undergraduate awards increased by 7 percent for Black students and 37 percent for Hispanic students.
- Proportionately larger increases occurred at: U. T. Health Science Center-Houston 67 percent for Black students and 83 percent for Hispanic students; 75 percent increase for Hispanic students at U. T. Southwestern Medical Center; and 49 percent for Hispanic students at U. T. Health Science Center-San Antonio.

U. T. Hispanic-Serving Institutions

- The presence of Hispanic-Serving Institutions (HSIs) in a university system is another indicator of its contributions to promoting access to students from diverse backgrounds.
- HSIs are defined as institutions that have at least 25 percent Hispanic full-time equivalent undergraduate enrollment, among whom at least 50 percent are low-income.
- The U. T. System includes six Hispanic-Serving Institutions: Brownsville/Texas Southmost College, El Paso, Pan American, Permian Basin, San Antonio, and the Health Science Center-San Antonio.
- Among public, four-year systems in the country, only the California State University System exceeds this number of HSIs. The CSU System includes nine HSIs (of 24 total universities), the Texas A&M University System includes three HSIs (of 10 total universities), and the City University of New York has four (of 11). The Texas State University System, the University of Houston System, and the New Mexico State University System each have one HSI.

Student Access, Success, and Outcomes

^{*} Includes students who began in summer of the given year.

Note: Brownsville/TSC is not included because first-time undergraduates typically matriculate at Texas Southmost College.

Source: Texas Higher Education Coordinating Board

- The number of first-time, full-time degree-seeking undergraduates attending U. T. System academic institutions has increased over the past five years rising 38.6 percent from fall 1999. Enrollments at U. T. Permian Basin more than doubled over the past five years, and increased by nearly 150 percent at U. T. San Antonio. The number rose 123 percent at Tyler due to downward expansion at that institution to enroll freshmen and sophomores.
- The headcount reported here includes those graduating from high school and enrolling in the summer semester.

Table I-7

First Time, Full-Time Degree-Seeking Undergraduates at U. T. Academic Institutions, Percent Female									
	Fall	1999	2000	2001	2002	2003

Note: Brownsville/TSC is not included because first-time undergraduates typically matriculate at Texas Southmost College.

Source: Texas Higher Education Coordinating Board

• Fifty-two percent of first-time full-time students were female in 2003. However, females persist in higher proportions than do male students (see Table I-23). Thus, 54 percent of all undergraduates were female in 2003, somewhat lower than the national average of 57 percent (see Table I-14).

Table I-8

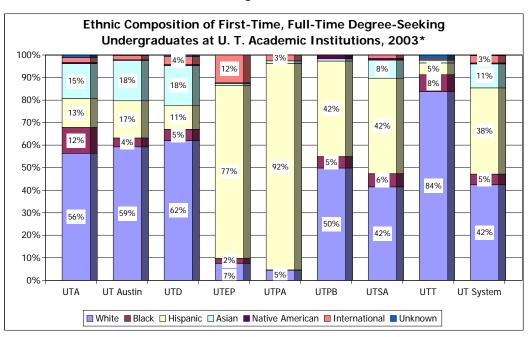

Ethnic Composition of First-Time, Full-Time Degree-Seeking Undergraduates at U. T. Academic Institutions

	Fall	White	Black	Hispanic	Asian	Native American	Inter- national	Unknown

Permian Basin	1999 2003	63.9 49.8	0.0 5.1	35.1 42.4	0.0 1.0	1.0 1.4	0.3	
San Antonio	1999	36.9	7.5	48.8	4.4	0.4	2.0	
	2003	41.5	5.9	42.3	8.0	0.7	1.6	
Tyler	1999	86.9	4.7	3.7	2.6	1.6	0.5	
	2003	83.8	7.5	5.2	1.2	0.2	0.7	1.4
Total Academic	1999	47.9%	4.9%	32.8%	11.4%	0.4%	2.6%	
Institutions	2003	42.4%	4.7%	38.2%	10.7%	0.4%	3.3%	0.3%

Note: Brownsville/TSC is not included because first-time undergraduates typically matriculate at Texas Southmost College.

- At U. T. Austin, U. T. Dallas, U. T. El Paso, U. T. Pan American, U. T. Permian Basin, and U. T. Tyler, the proportion of non-White first-time, full-time degree-seeking undergraduates has increased between fall 1999 and fall 2003.
- In 2003, Hispanic students comprised just over 38 percent of all first-time, full-time, degree-seeking undergraduates at U. T. System academic institutions. This was up from 33 percent in 1999, and was approaching the overall proportion 40 percent of college-age Hispanics in Texas.
- However, the percentage of Black students has declined at six of nine academic institutions.
 Comparatively larger increases at the other three result in a small total decrease.

Figure I-3

^{*}No first-time, full-time degree-seeking students enrolled at Brownsville for fall 2003.

Ethnic composition of first-time, full-time undergraduates compared with composition of high school graduates in state

Table I-9

Texas High School Graduates by Ethnicity 2003-2004 Academic Year							
	# h.s. graduates	% by ethnicity					
White	116,497	47.7%					
Black	33,213	13.6					
Hispanic	85,412	35.0					
Native American	739	0.3					
Asian-Pacific Islander	8,304	3.4					
Total	244,165						
Source: Texas Education Agency							

- The ethnic composition of the Texas high school graduating class of 2003-04 was split, with less than half (48 percent) White students.
- Hispanic students comprised just over one-third of the 2004 high school graduating class.
- U. T. System academic institutions together matriculated a smaller proportion of White students (42 percent) and a larger proportion of Hispanic students (38 percent) than the proportions among 2004 high school graduates in Texas.
- However the proportion of new Black students (5 percent) at U. T. System academic institutions has been and continues to be lower than the proportion among the high school graduates (14 percent).

- Nationally, some states have experienced declines in Black enrollments among first-time students. In fall 2005, the University of Kentucky experienced a 41 percent decline, from 256 (6 percent of the entering class) to 151 (4 percent). In Florida's public universities, the number 5,371 was 566 less than the previous year, representing 14 percent of total enrollment, down from nearly 16 percent and the lowest it has been since 1999. (*Chronicle of Higher Education*, "Public Colleges in Florida and Kentucky Try to Account for Sharp Drops in Black Enrollments," 10/14/2005: http://chronicle.com/daily/2005/10/2005101403n.htm.)
- Furthermore, at U. T. Brownsville/Texas Southmost College, U. T. El Paso, U. T. Pan American, and U. T. San Antonio, Hispanic students are the significant majority of the population – reflecting the general population of the counties that supply students to those respective universities.

Contextual Measure: Student Preparation

Table I-10

Average ACT/SAT Scores of First-Time, Full-Time Degree-Seeking Undergraduates at U. T. Academic Institutions									
		Fall 00*	Fall 01	Fall 02	Fall 03	Fall 04

	SAT	1096	1089	1071	1042	1068			

^{*}In fall 2000, the Gateway Program which admits provisional students was moved from summer to fall; since then, the SAT/ACT scores of these provisional students have been averaged into the fall cohort.

Source: U. T. System Academic Institutions

- Average SAT and ACT scores provide a perspective on student preparation for college, for the subsection of students submitting scores.
- Some institutions include these scores in the matrix of data they use to benchmark their performance against peer institutions (see Institutional Profiles Section V). While institutions may

 $[\]ensuremath{^{**}\text{ACT}}$ averages are based on much smaller numbers of students than SAT averages at UT Dallas.

- seek increases in average scores, other issues related to access and preparation weigh in admission decisions.
- Research shows that test scores in combination with high school rank are better predictors of college performance than either factor alone.
- For those students submitting test scores, over the past five academic years, average SAT scores have increased at all campuses except U. T. Tyler. Average ACT scores have held level or declined very slightly at U. T. Arlington, U. T. El Paso, U. T. Pan American, U. T. San Antonio, and U. T. Tyler.
- In fall 2004, average SAT scores increased over averages in fall 2003 at three institutions: U. T. Dallas, U. T. El Paso, and U. T. Tyler. The SAT scores at U. T. San Antonio decreased from 2003 to 2004 because of a change in institutional practices. The large majority of provisional students are now admitted in the fall semester instead of the spring or summer.
- Average ACT scores increased slightly from fall 2003 to fall 2004 at U. T. Dallas, U. T. El Paso, and U. T. Permian Basin.

Table I-11

Number of Top 10 Percent High School Graduates Enrolled as First-Time Undergraduates at U. T. Academic Institutions									
Fal	l 2000	2001	2002	2003	2004				
Arlington	323	326	349	405	403				
Austin	3,319	3,404	3,878	4,219	4,186				
Dallas	132	239	268	316	321				
El Paso	228	274	290	303	306

Permian Basin	25	35	43	53	49				
San Antonio	215	182	343	423	342				
Tyler	63	72	54	68	81				

Note: Brownsville/TSC is not included because first-time undergraduates typically matriculate at Texas Southmost College.

- These data show the numbers of first-time degree-seeking undergraduates who graduated in the top 10 percent of their Texas high school class and who applied, were admitted, and enrolled at a U. T. System academic institution.
- From fall 2000 to fall 2004, the numbers have increased at every U. T. System academic institution.
- However, with fast overall enrollment growth, the proportion has declined at U. T. San Antonio and U. T. Tyler.

Figure I-4

Figure I-5

- The trend in significant enrollment increases continued for undergraduate enrollment at U. T. System academic institutions, averaging nearly 20 percent from 2000 to 2004.
- The proportion of growth was greatest at U. T. Permian Basin, U. T. San Antonio, and U. T. Tyler, but enrollment increased by 25 percent or more at six institutions and by 24 and 23 percent at U. T. Arlington and U. T. El Paso respectively. U. T. Austin capped enrollment, and enrollment is now decreasing slightly.
- Overall enrollment growth reflects both growth in the college-going population and the overall health of the economy.

Gender

Table I-14

Undergraduate Gender Composition, Percent Female at U. T. Academic Institutions								
	Fall 2000	Fall 2001	Fall 2002	Fall 2003	Fall 2004			
Arlington	53.3%	53.3%	53.3%	52.5%	53.2%			
Austin	50.5	50.5	50.5	51.2	51.6			
Brownsville/TSC	61.1	61.4	60.7	59.7	59.5

System	53.9%	54.0%	54.1%	53.8%	54.0%			
Source: Texas Higher Education Coordinating Board								

Source: Texas Higher Education Coordinating Board

- The gender composition at U. T. System academic institutions has remained generally constant over the last five years.
- Female students represent at least half, and often significantly more than half, of the undergraduate students on all campuses except U. T. Dallas. This parallels national enrollment patterns, where 57.6 percent of college students are female.
- At U. T. Brownsville/Texas Southmost College, U. T. Permian Basin, and U. T. Tyler, the proportion of female students has declined between 2000 and 2004, but they still outnumbered male students by nearly three to two.
- The proportion of female students has increased slightly from 2000 to 2004 at U. T. Austin and U. T. El Paso.

Age

Table I-15

Average Undergraduate Age at U. T. Academic Institutions								
Fall	2000	2001	2002	2003	2004			
Arlington	25	24	24	24	24			
Austin	21	21	21	21	21			
Brownsville/TSC	25	25	25	25	25			
Dallas	26	26	25	25	25			
El Paso	24	24	23	23	24			
Pan American	23	23	23	23	23			
Permian Basin	29	28	28	27	27			
San Antonio	25	25	24	24	23			
Tyler	28	27	27	26	26			

Source: Texas Higher Education Coordinating Board

Between 2000 and 2004, the average undergraduate age has decreased slightly at U. T. Arlington, U. T. Dallas, U. T. Permian Basin, U. T. San Antonio, and U. T. Tyler. These decreases parallel the decrease in proportion of part-time undergraduate students at these institutions. (See Table I-16.) Higher average ages of the undergraduate population at U. T. Brownsville/Texas Southmost College, U. T. Dallas, U. T. Permian Basin, and U. T. Tyler may be affected by the number of stopouts (time of matriculation to actual degree).

Race and Ethnicity

Figure I-6

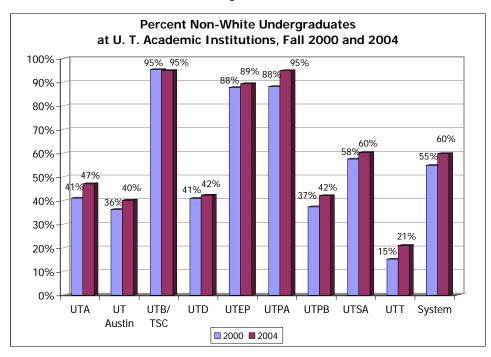

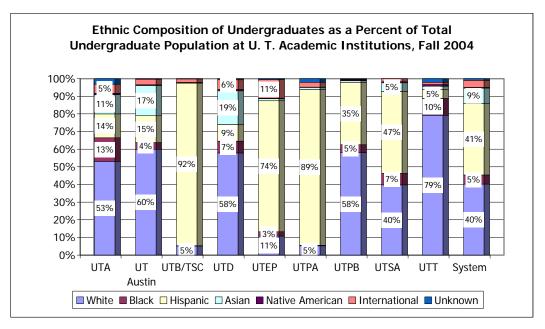

Figure I-7

- Although the numbers of non-White undergraduate students have increased from 2000 to 2004, the proportion of each ethnic population, illustrated here for fall 2004, has not changed significantly.
- Forty-one percent of all U. T. System academic institution undergraduates enrolled in fall 2004 were Hispanic, approaching the overall proportion 45 percent of Hispanic students enrolled in K-12 schools in 2004, as reported by the Texas Education Agency.
- U. T. Brownsville/Texas Southmost College, U. T. El Paso, and U. T. Pan American serve the largest proportion of Hispanic students; U. T. Permian Basin and U. T. San Antonio also serve large numbers of Hispanic students.
- U. T. Arlington, U. T. Dallas, and U. T. Tyler serve comparatively large proportions of Black students.

Contextual Measure: Part-time students

- Part-time students continue to comprise a significant portion of undergraduate enrollments at all U. T. System academic institutions, although the overall proportion has decreased slightly over the past five years.
- Nationally, 22 percent of undergraduates were enrolled part-time in public four-year institutions in 2003, according the National Center for Education Statistics (NCES). NCES reports that in the past 10 years, full-time enrollment has grown three times as fast as part-time enrollment and predicts that over the next 10 years, full-time undergraduate enrollment will continue to increase comparatively faster.
- At all U. T. System academic institutions except U. T. Austin, the overall proportion of part-time students is above the national average. Over the past five years, this proportion has declined at most U. T. academic institutions, held level at UTB/TSC, and increased at U. T. El Paso.

Table I-16

Part-Time Undergraduates, Percent of Total at U. T. Academic Institutions								
Fall	2000	2001	2002	2003	2004

- Comparatively few of the U. T. System's first-time degree-seeking undergraduates start out as part-time students. And the proportion has declined from 6 percent to 3.5 percent from fall 1999 to fall 2003.
- The National Center for Education Statistics reported in fall 2003 that 21 percent of the nation's first-time degree-seeking students are enrolled part-time.
- However, as they progress through their undergraduate careers, the proportion of part-time students increases. In fall 2004, 25.5 percent of all undergraduates at U. T. System academic institutions were enrolled part-time (see Table I-16).

Affordability and Undergraduate Student Financial Aid

Overview:

- In fiscal year 2004-05, \$767 million was allocated for 228,587 financial aid awards to U. T. System academic institution students (some students received more than one award, including grants, loans, and work study). (See Table I-20.)
- Forty percent of undergraduate students received some form of need-based aid. Fifty percent received some amount of need-based, merit, or other form of aid.
- Of the scholarships and aid, federal grants made up 42 percent, a decrease of three percentage points from last year; institutional funds increased to 33 percent from 30 percent the previous year; state funds provided another 17 percent, up slightly from 16 percent in 2003-04; and 9 percent came from private sources, as in the previous year.
- By dollar amount, loans comprised 52 percent of total awards, down from 56 percent in 2003-04; grants and scholarships comprised 47 percent, up from 43 percent in 2003-04; and work-study provided one percent of all financial aid, unchanged from the previous year.
- Taken together, these sources of financial aid enhance the accessibility of U. T. System institutions to students from a wide range of economic backgrounds.

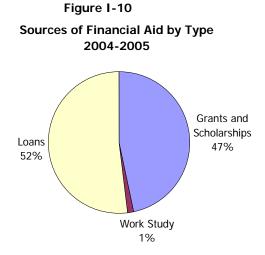

Table I-18

Non-Loan Financial Aid Awards and Total Tuition and Fees at U. T. Academic Institutions FY 2004-2005

	Total Non-Loan Financial Aid Awards	Total Tuition and Fee Charges*

Source: Annual Financial Report, Exhibit B and Academic Institutions

- In FY 2004-2005, financial aid awards averaged 68 percent of the total cost of tuition and fees at all U. T. System academic institutions.
- For some institutions, total financial aid awards covered more than total tuition and fees, contributing to other costs of attendance that students incurred.

Table I-19

Permian Basin		64.9	55.6	61.2	65.6	67.8		
San Antonio		57.8	62.8	60.0	58.6	51.9		

Notes: Most students at Brownsville/TSC matriculate at TSC, so first-year persistence rates cannot accurately be calculated for the campus.

60.0

60.5

68.1

54.3

56.0

Due to data collection changes at the Texas Higher Education Coordinating Board, the calculation of first-year persistence rates for the fall 2003 cohort are based on both non-degree seeking and degree-seeking students. In previous years, non-degree seeking students were excluded from this calculation. Therefore, the persistence rate for the fall 2003 cohort at many U. T. System institutions is lower and may not be comparable to persistence rates of previous years.

Persistence rates for entering cohorts may be inconsistent because of variability in social security numbers (SSNs). For example, at U. T. El Paso, adjusting for changed SSNs in the fall 2003 cohort, the first-year persistence rate would be 66.4%.

Permian Basin	Female Male		64.6 65.6	57.0 53.4	63.5 57.4	66.7 64.1	68.3 67.2
San Antonio	Female Male		63.9 50.9	65.1 60.2	59.2 60.9	59.8 57.1	54.2 49.6
Tyler	Female Male		67.7 68.8	59.6 60.7	60.1 61.0	50.9 58.6	58.2 53.2

Due to data collection changes at the Texas Higher Education Coordinating Board, the calculation of first-year persistence rates for the fall 2003 cohort are based on both non-degree seeking and degreeseeking students. In previous years, non-degree seeking students were excluded from this calculation. Therefore, the persistence rate for the fall 2003 cohort at many of our institutions is lower and may not be comparable to persistence rates of previous years.

- At all campuses, females persisted in higher proportions than males, for the class matriculating in fall 2003.
- The increases hold for minority groups: persistence rates of Hispanic students exceeded those of White students at U. T. Arlington, U. T. El Paso, U. T. Pan American, U. T. Permian Basin, and U. T. San Antonio. And the rates increased over this five-year period among Hispanic students at U. T. Austin, U. T. Dallas, U. T. Pan American, and U. T. Permian Basin.
- Persistence rates among white students increased at U. T. Austin, U. T. Dallas, U. T. El Paso, and U. T. Pan American.
- Improving persistence rates is a high priority for institutions and the U. T. System. It is addressed in many institutional Compacts as well, including investments in advising, freshman seminars, and other programs to improve quality of undergraduate experience.

Persistence rates for international students are inconsistent because of variability in social security numbers (SSNs). For example, at U. T. Austin, accounting for SSN changes, the first-year persistence rate for international students averages approximately 96%.

Due to data collection changes at the Texas Higher Education Coordinating Board, the calculation of first-year persistence rates for the fall 2003 cohort are based on both non-degree seeking and degree-seeking students. In previous years, non-degree seeking students were excluded from this calculation. Therefore, the persistence rate for the fall 2003 cohort at many of our institutions is lower and may not be comparable to persistence rates of previous years.

^{**} Number of students is too small to report.

Graduation Rates

- Graduation rates may vary from national statistics depending on whether institutions reported Coordinated Admission Program (CAP) students as degree-seeking or non-degree-seeking students. Not all institutions enroll CAP students.
- The graduation rates illustrated here demonstrate that increasing numbers of students at nearly every U. T. System academic institution are graduating in four, five, or six years, but the overall low rates underscore the need to emphasize improvement in this area.
- U. T. System academic institutions have in place and are enhancing programs to assist students in completing their studies more quickly. These initiatives acknowledge that multiple factors influence individual students' decisions about college attendance, and that institutions can have some impact by improving numerous processes and services, from advising to student engagement activities to housing and much more.
- Legislation passed in the 79th session of the Texas Legislature calls for annual reports by all general academic institutions on efforts concerning timely graduation. And, in November 2005, the U. T. System announced a System-wide initiative to improve graduation rates, including setting specific improvement targets for the next ten years. Results of these initiatives should be reflected in trends over the coming years.
- The percentage of first-time, full-time degree-seeking undergraduates who graduated in four or five years or less from the same institution has improved throughout the U. T. System over the past five years.
- Steady, incremental improvement is an important indicator that the systematic efforts noted above are beginning to make a difference.
- In some cases, proportionately larger change has occurred:
 - The four-year rate increased by nearly six percentage points at U. T. Austin, by four at U. T. Pan American, and by nearly seven at U. T. Permian Basin.
 - The five-year rate increased by 12 points at U. T. Permian Basin, by over 9 percentage points at U. T. Arlington, by 5 points at U. T. Austin, by almost four points at U. T. El Paso, by six points at U. T. Pan American. (It increased by nearly 15 points at U. T. Tyler with just two years of data.)
- Many first-time students at U. T. San Antonio plan to transfer to U. T. Austin after their first year as part of the CAP program. This dilutes the graduation rates at U. T. San Antonio.
- Because students at U. T.
 Brownsville/Texas Southmost College typically start at TSC, accurate graduation rates cannot be calculated. These data issues will be addressed in future studies.

Table I-25

Undergraduates Graduating in Four Years or Less from Same								
U. T. Academic Institution, Total								
Enrolled Fall	1996	1997	1998	1999	2000			
Arlington	13.2%	12.7%	12.3%	14.5%	15.1%

Figure I-12

Graduation Rates for Undergraduates by Institution: 4-Year, 5-Year, and 6-Year Graduating from the Same U. T. Academic Institution; 6-Year Composite; and 4-Year Transfer*

^{* &}quot;4-Yr transfer" rate: Students transferring with 30 or more semester credits from a community college who received an undergraduate degree within four years of enrolling at a U. T. institution. "6-Yr this + other TX" rate: Students graduating from same university or another Texas institution (beginning in 1998, includes students graduating from private institutions).

 Six-year graduation rates are more commonly used to benchmark student success. According to the National Center for Education Statistics, the six-year graduation rate for those receiving a Bachelor's degree is 52 percent for those students enrolled in 1996.

Table I-27

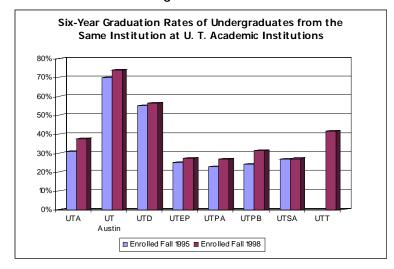

Undergraduates Graduating in Six Years or Less from the Same U. T. Academic Institution, Total							
Enrolled Fall	1995	1996	1997	1998			
Arlington	30.6%	36.4%	36.7%	37.6%			
Austin	69.9	71.9	70.1	73.8

San Antonio	26.6	25.5	27.6	27.0			
Tyler*				41.4			

^{*} Tyler did not admit freshmen until Summer/Fall 1998.

Source: Texas Higher Education Coordinating Board

- While still low, six-year graduation rates have steadily increased at all U. T. System academic institutions between the 1995 and 1998 matriculation year. And, for some U. T. System academic institutions, the change appears to be accelerating. (U. T. Tyler has just one year of data from its first year of freshmen admissions in 1998.)
- The rate has increased between the 1995 and 1998 entering classes by:
 - 7 points at U. T. Arlington
 - 3.9 points at U. T. Austin
 - 1 point at U. T. Dallas
 - 2.1 points at U. T. El Paso
 - 3.7 points at U. T. Pan American
 - 7.3 points at U. T. Permian Basin
 - 0.4 points at U. T. San Antonio

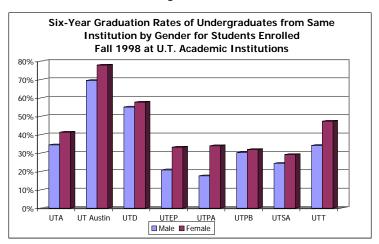

Figure I-13

As noted, the improvement of six-year graduation rates is a high priority for U. T. System institutions; these upward trends should continue with investment in new and enhanced programs to support student success. For example, U. T. Austin has made improving retention and graduation rates a high priority, setting goals of greater than 50 percent four-year and greater than 75 percent six-year graduation rates. U. T. El Paso states in its institutional compact a goal of achieving a 50 percent six-year graduation rate by 2014.

Female and Male Student Graduation Rates

Figure I-14

- Historically, a higher proportion of female than male students have earned undergraduate degrees in six or fewer years at U. T. System academic institutions. This parallels the national trend.
- This trend continues for students who matriculated in fall 1998.

Graduation Rates by Ethnic and Racial Groupings

- As noted earlier, the overall six-year graduation rates have increased significantly at every U. T. System academic institution.
- This trend applies, with some variation, across ethnic and racial groups.

Table I-28

Tyler	1998	41.9	42.9	40.0	**				

^{**}Number of students too small to report.

Notes

Persistence rates for international students are inconsistent because of variability in social security numbers (SSNs). For example, at U. T. Austin, adjusting for changed SSNs, the graduation rate for international students would be 79%.

 $[\]hbox{U. T. Brownsville students begin study at Texas Southmost College, so six-year graduation rates are not meaningful for this institution. } \\$

U. T. Tyler did not admit freshmen until Summer/Fall 1998.

- It is noteworthy that, over the past four years for institutions where six-year rates can be tracked, six-year graduation rates among Hispanic students increased at all institutions except U. T. Dallas.
- At U. T. Arlington, U. T. El Paso, U. T. Pan American, U. T. Permian Basin, and U. T. San Antonio, this
 rate exceeds that of White students.

Transfer Student Graduation Rates

- National and state trends show that increasing numbers of students attend more than one institution before completing a baccalaureate degree. A U.S. Department of Education study of transcripts found that for students who graduated from high school in 1992 (http://nces.ed.gov/programs/quarterly/vol_5/5_3/4_2.asp#2):
 - 60 percent attended more than one college;
 - 20 percent of those receiving a baccalaureate earned the degree at an institution different from the one at which they matriculated;
 - 10 percent earned their degree in a different state from the one in which they began college.
- It is, therefore, important to track the progress and success of transfer students.

Table I-29

Four-Year Graduation Rates of Undergraduate Transfer Students* at U. T. Academic Institutions									
Enrolled Fall	1996	1997	1998	1999	2000				
Arlington Austin Dallas El Paso Pan American Permian Basin San Antonio Tyler	45.2% 60.3 52.7 33.8 33.0 43.5 42.1 53.7	47.0% 57.0 53.1 35.4 35.5 39.0 43.1 59.3	49.6% 60.7 56.4 35.5 42.6 47.5 45.9	51.8% 60.8 54.4 42.3 46.7 47.4 44.5 53.9	49.2% 63.6 57.2 44.8 50.0 51.9 48.4 67.6				

^{*}Students transferring with 30 or more semester credits from a community college who received an undergraduate degree within four years of enrolling at a U. T. institution.

- Taking the four-year graduation rate of transfer students as a proxy for a six-year graduation rate, on average, transfer students who enter U. T. System academic institutions with 30 credits are considerably more likely to complete their baccalaureate degrees within the equivalent of six years, than are students who entered these institutions as first-time students.
- For these students transferring between fall 1996 and fall 2000, graduation rates, already comparatively high, have increased at every U. T. System academic institution.

Composite Graduation and Persistence Rates

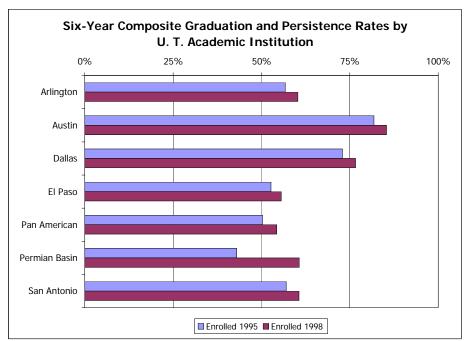

- Looking at composite persistence and graduation rates focuses on the success of students who remain in college, but change schools at some point before graduating. Reports on composite rates are required by the Texas legislature.
- However, these data are difficult to track outside of Texas and outside of public higher education. In July 2005, over 40 governors and 12 national organizations signed an agreement to produce graduation rates that would more completely illustrate, across states, students' progress to degree completion
- These data show that for those students who started at one public campus in Texas, and then shifted to another Texas public institution, graduation rates are from 2 to 14 points higher than if the sameinstitution rates are considered alone.

Table I-30

Six-Year Composite Graduation and Persistence Rates Students Enrolled at U. T. Academic Institutions									
	Enrolled Fall	Graduating from Same University	Graduating from Another Texas Institution*	Persisting at Same Institution	Persisting at Another Texas Institution*	Composite Graduation and Persistence Rate*

Tyler	1998	66.3	71.4	80.0	**				

^{**}Number of students too small to report.

Notes

Beginning in 1998, the composite graduation and persistence rates include students enrolled or graduating from private institutions. Prior years' rates only track students enrolled or graduating from public institutions in Texas.

Persistence rates for international students are inconsistent because of variability in social security numbers (SSNs).

- For classes matriculating from 1995 through 1998, the composite persistence and graduation rate varied among ethnic and racial groups but, overall, has increased for most groups at U. T. System academic institutions. (The rate was only down very slightly for Hispanic students who matriculated at U. T. Dallas.)
- The increases were comparatively high among Black students at U. T. Dallas (up nearly 23 points), U. T. Pan American (up 19 points), and among Hispanic students at U. T. Permian Basin (up nearly 31 points).

U. T. Brownsville students begin study at Texas Southmost College, so composite six-year persistence and graduation rates are not meaningful for this institution.

U. T. Tyler did not admit freshmen until Summer/Fall 1998.

- The number of degrees awarded increased from 2000 to 2004 at U. T. System academic institutions except U. T. Tyler (where the number of degrees awarded increased in 2003-04 compared with the previous year).
- As student retention and graduation rates increase, the number of degrees may be expected to increase as well.

- Between 2000 and 2004, a significant majority of the degrees awarded by the academic institutions were conferred to women.
- The proportion of women receiving degrees (57 percent) exceeded the proportion of women enrolled (54 percent).

- The proportion of baccalaureate degrees awarded to Black students increased from 2000 to 2004 at U. T. Arlington, U. T. Brownsville/Texas Southmost College, U. T. Dallas, U. T. Pan American, and U. T. San Antonio.
- The proportion of baccalaureate degrees awarded to Hispanic students increased over this period at U. T. Arlington, U. T. Brownsville/Texas Southmost College, U. T. Dallas, U. T. El Paso, U. T. Permian Basin, U. T. San Antonio, and U. T. Tyler.
- Although it is small compared with other groups of students, the proportion of international students receiving degrees more than doubled at U. T. Arlington from 2000 to 2004, and increased by over three percentage points at U. T. Dallas.
- Nationally, U. T. System institutions continue to rank highly in numbers of baccalaureate degrees awarded to Hispanic students. On average nationally, 6.4 percent of baccalaureate degrees were awarded to Hispanic students in 2003-04, compared with an average of 30.2 percent at U. T. System academic institutions.
- During the 2003-04 academic year, the most recent year for which comparable national institutional data are available, the U. T. System institutions were at the head of the list of the top 100 institutions nationwide granting the bachelor's degree to Hispanic students (*Black Issues in Higher Education*, June 2005).

- Pan American 2nd
- Fl Paso 3rd
- San Antonio 4th
- Austin 8th
- U. T. System institutions also ranked in the top ten in numbers of baccalaureate degrees awarded to Hispanic students in specific disciplines:
 - U. T. Austin biological and biomedical sciences (7); engineering (3); English language and literature (10); mathematics and statistics (1); physical sciences (2); social sciences (2).
 - U. T. Brownsville/Texas Southmost College mathematics and statistics (3).
 - U. T. El Paso biological and biomedical sciences (5); business and management (4); engineering (4); health professions (2); physical sciences (4).
 - U. T. Pan American biological and biomedical sciences (2); business and management (6); English language and literature (1); health professions (3); mathematics and statistics (4); physical sciences (4).
 - U. T. San Antonio biological and biomedical sciences (1); business and management (2); engineering (9); English language and literature (7); mathematics and statistics (8); psychology (4). [For more detail on these rankings, see Section V, pp. V-37-42.]

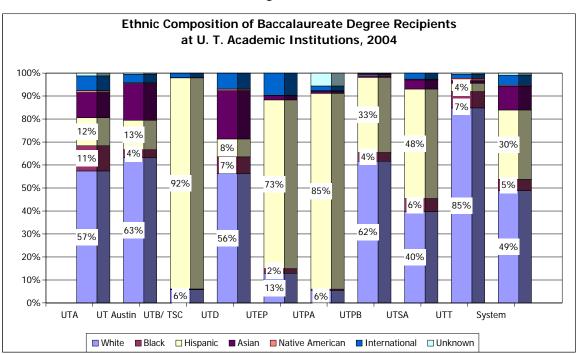

Figure I-16

Student Outcomes: Licensure Exams, Student Experience, Learning Outcomes

<u>Using Multiple Measures</u>. The U. T. System has the opportunity to use new and existing tools to create a new model to address the issue of student outcomes. Based on national research and emerging experience, the U. T. System has adopted a multiple-measure framework to assess student outcomes from four different perspectives:¹

- Pass rates on program- or degree-specific state or national licensing examinations for regulated professions, including indicators related to production of teachers.
- Student satisfaction with their educational experience.
- Student learning outcomes: test results on assessments of student problem solving, critical thinking, and analytic writing.
- Rates of post-graduation employment or further professional/graduate study.

One or more of these measures are used in the State of Texas accountability system,² by individual institutions, in other states' systems, or in national studies.³ However, it is still somewhat unusual for a public university system to present and analyze data in one place on this group of multiple measures. This is important because each measure alone can only address particular aspects of the student experience; all are needed to provide a fuller accounting of the value added by an educational experience in a U. T. System institution.⁴

Licensure Examination Pass Rates in Critical Fields

The University of Texas System's Contribution to Teacher Preparation

<u>Licensure exams</u>. Teacher preparation is a major responsibility of the U. T. System academic institutions. The quality of teacher and administrator graduates is a key factor in the supply of well-qualified high school graduates. Teacher education programs and success of graduates in passing licensure exams are, thus, a critical lynchpin in the state's K-16 system. Overall exam pass rates for teacher licensing have improved between 2000 and 2004, and tend to be comparatively high in many cases for test takers who graduated from U. T. System institutions.

¹In addition to these measures, each institution assesses outcomes of specific academic programs and submits this information as part of self-studies for regional and specialized accreditation reviews.

	Female	96.2	94.7	97.4	91.6	95.1				
Tyler	Male	93.8	85.4	94.9	94.6	98.7				
	Female	94.2	93.2	94.7	97.7	98.3				

- From 2000 to 2004, pass rates for females have increased at every campus except U. T. San Antonio. Pass rates for males have also increased at all campuses except U. T. Austin and U. T. San Antonio.
- There is comparatively little difference in pass rates between male and female teaching certification candidates who attended most U. T. System academic institutions.
- For the past two years, U. T. Dallas has had 100 percent initial pass rates for teacher certification exams for males and females of all ethnicities.

Licensure Exam Pass Rates for Nursing and Engineering

Licensure examination pass rates indicate the effectiveness of the institution's individual instructional program in preparing graduates for credentialing in certain regulated professional fields. Reports on these pass rates are required in Texas by the Legislative Budget Board. These data provide an indirect measure of the contribution of specific U. T. System institution programs to the pool of qualified professionals in the state in some high-demand professions.

Table I-38

Licensure Exam Initial Pass Rates for Nursing and Engineering Baccalaureate Graduates at U. T. Academic Institutions									
		99-00	00-01	01-02	02-03	03-04

Note: Pass rates used in this report represent results from first-time test takers within a given fiscal year.

Source: Legislative Budget Board Estimates and Performance Measures Reports

- Nursing. Under the Nursing Practice Act, only licensed individuals may practice or offer professional nursing services in the state. In addition to other requirements, individuals must pass the National Council of Licensure Examinations-RN in order to practice in Texas. Pass rates have increased between 1999-00 and 2003-04 for students at each institution except U. T. Pan American. U. T. System institution pass rates have remained in the 80th and 90th percentiles for the past four years. However, rates fluctuate from year to year and from institution to institution.
- Engineering. Under the Texas Engineering Practice Act, only duly licensed persons may legally perform, or offer to perform, engineering services for the public. The terms "engineer" or "professional engineer" can only be used by persons who are currently licensed. These examination pass rates refer only to those students who have passed the Fundamentals of Engineering Exam within one year after graduation; the examination is administered by the National Council of Examiners for Engineering and Surveying. Upon passing the exam, the successful examinee can apply for an Engineer in Training Certificate. Statewide, average pass rates have approached 80 percent over the past few years. In 2002, the statewide average pass rate was 73 percent; all U. T. System institutions exceeded this rate. From 1999-00 to 2003-04, pass rates at all U. T. System academic institutions increased except at U. T. Tyler where they have been 100 percent every year. In 2003-04, pass rates were in the 80th and 90th percentiles for students from all institutions except U. T. San Antonio.

Student Experience

Assessing the outcomes of learning and the student experience is a high priority for the U. T. System. Each institution assesses outcomes of specific academic programs and submits this information as part of self-studies for regional and specialized accreditation reviews. At the System level, academic institutions also participate in the National Survey of Student Engagement (NSSE) and the Collegiate Learning Assessment (CLA), which give the System and institutions national benchmarks against which trends in learning outcomes can be compared and progress can be tracked.

NSSE Outcomes

Student satisfaction is an outcome measure of the educational experience. Legislation passed in 1999 in the 76th session of the Texas Legislature requires that all state agencies and public universities address customer satisfaction. To help meet this mandate, U. T. System participates in the NSSE, which provides longitudinal, nationally normed data on a wide range of student experience topics. Administered by the University of Indiana, the NSSE survey assesses the extent to which undergraduates at four-year colleges and universities engage in a variety of educational practices.

- Evaluation by first-year students of academic advising as "good" or "excellent" increased from 2003 to 2005 at U. T. Austin, U. T. Dallas, U. T. Permian Basin, and U. T. Tyler.
- Over the same period, seniors increasingly evaluated academic advising as "good" or "excellent" at U. T. Austin, U. T. Brownsville/TSC, U. T. Dallas, U. T. Pan American, and U. T. Tyler.
- Increasing emphasis on and investments in advising by U. T. System institutions are intended to improve student satisfaction and success.

Student Experience

- A large majority of students reported their overall educational experience as "good" or "excellent" in 2003, 2004, and 2005.
- Nationally, in 2003, 2004, and 2005, 87 percent of survey participants reported that their educational experience was "good" or "excellent."
- Between 2003 and 2005, an increased proportion of first-year students participating in this survey reported being satisfied with their experience at U. T. Brownsville, U. T. El Paso, U. T. Pan American, U. T. San Antonio, and U. T. Tyler.
- Over the same period, the proportion of seniors rating their experience "good" or "excellent" increased at U. T. Pan American and U. T. Tyler.

- Overall, a large proportion of students at all institutions (ranging around 80 percent) indicate that they would attend the same institution again. This proportion is smaller than the educational experience rating. This parallels the national trend, which averaged 82 percent in 2003, 2004, and 2005.
- Between 2003 and 2005, the percentage of first-year students indicating that they would attend
 the same institution again increased at U. T. Brownsville, U. T. Permian Basin, U. T. San Antonio,
 and U. T. Tyler. U. T. Pan American is down from 2003 level but did increase from 2004 to 2005.
- Over the same period, seniors increasingly said they would attend the same institution again at U. T. Arlington, U. T. Austin, U. T. Pan American, U. T. San Antonio, and U. T. Tyler. U. T. Brownsville is down from 2003 level, but did increase from 2004 to 2005.
- Ratings exceeded the national average among freshmen at U. T. Austin, U. T. Brownsville/TSC,
 U. T. Pan American, U. T. Permian Basin, and U. T. Tyler.
- Ratings among seniors also exceeded the national average at U. T. Austin, U. T. Brownsville/TSC, U. T. Pan American and U. T. Tyler.

Student Learning Outcomes

In 2004-05, The University of Texas System contracted with the RAND Corporation's Council for Aid to Education to conduct the Collegiate Learning Assessment (CLA) at each academic institution within the U. T. System. The purpose of the assessment is to understand how well students do on critical thinking, problem solving, and writing tasks, not on specific course-related knowledge. Nationwide, a total of 124 institutions participated in the 2004-05 assessment. The 2004-05 test results will help establish a baseline from which future progress can be measured.⁵

<u>A Tool to Assess General Intellectual Skills</u>. The CLA test results help answer several important questions:

- How well do the learning outcomes of students enrolled in U. T. System institutions compare to students from other institutions?
- Do students at U. T. System institutions, relative to students from other institutions, perform above, at, or below expected levels on problem solving, critical thinking, and analytic writing tasks?
- Have the institutions added value as indicated by seniors showing levels of critical thinking, writing, and problem solving higher than expected relative to that expected of freshmen?

<u>Test Methodology</u>. Tests are administered to a sample of an institution's freshmen and seniors and results are compared against those obtained from other similar institutions. The CLA tests two kinds of performance and analytic writing tasks which require open-ended responses; there are no multiple-choice questions.

- Performance tasks require students to use an integrated set of critical thinking, analytic
 reasoning, problem solving, and written communication skills to answer open-ended
 questions about a hypothetical, but authentic problem. A typical question might ask a
 student to identify and compare strengths and limitations of alternative hypotheses, points of
 view, courses of action on a particular problem, by looking at a variety of documents and
 data.
- 2. **The analytic writing tasks** require students to "make-an-argument," "critique-anargument," and write analytically. A "Make-an-Argument" question asks students to support or reject a position on a particular issue. A "Critique-an-Argument" question asks students to evaluate the validity of an argument made by someone else. These writing tasks measure a student's ability to articulate complex ideas, examine claims and evidence, support ideas with relevant reasons and examples, sustain a coherent discussion, and use standard written English.

What Is the Basis for Comparing Scores? Because institutions enroll freshmen with quite different levels of preparation for college-level work, it is important to ask how much students might be expected to learn based on their entering skills. If students are not well prepared, it will be more difficult for them to achieve a particular level of learning outcome than students who enter well-prepared for college level work. The CLA uses ACT, or ACT-equivalent scores to provide a basis to compare students with similar levels of preparation for college. With this information, test results can reveal the extent to which the institution helps students achieve their expected level of learning – a measure of the added value to the students' learning experience.

⁵ Council for Aid to Education, *Collegiate Learning Assessment*, "CLA in Context 2004-2005," accessible at: http://www.cae.org/content/pdf/CLA%20Context%200405.pdf. See also, Richard H. Hersh, "What Does College Teach?" *The Atlantic online*, November 2005, http://www.theatlantic.com/doc/200511/measuring-college-quality.

<u>Definitions</u>. "Deviation scores" indicate the degree to which an institution's students earn higher or lower scores than would be expected. "Expected scores" are based upon the students' admissions test scores and the typical relationship between admissions scores and CLA scores using a statistically valid sample of undergraduate institutions.

<u>Initial Results Are Positive</u>. Results from this preliminary phase of assessment show that for all campuses that participated in sufficient numbers, overall performance was at the mid-range of expected and national performance and, in some cases, above expected levels. Seniors had strong results in problem solving and even stronger results in analytic writing. And the difference between freshmen and senior scores was significant, suggesting that many U. T. System academic institutions add value during their students' college careers.

<u>Summary of Results</u>. Freshmen and seniors at U. T. System academic institutions scored as well or better than the national sample on the performance task, which measures problem solving, critical thinking, and analytical reasoning. Seniors from U. T. San Antonio, U. T. Pan American, and U. T. Dallas did particularly well compared with the national sample. On the analytic writing task scores, seniors at U. T. El Paso, U. T. San Antonio, U. T. Pan American, U. T. Austin, U. T. Tyler, U. T. Dallas, and U. T. Arlington did even better compared with the national sample. Comparisons of freshmen and senior score results suggest that U. T. Permian Basin, U. T. San Antonio, U. T. Pan American, and U. T. Arlington added significant value to their students when these score differences are taken into consideration.

<u>How Test Results Will Be Used</u>. Chief academic officers may use the test results to address weaknesses in their general curriculum or to build opportunities to improve critical thinking, problem solving, analytical reasoning, and writing skills in the overall undergraduate preparation program. Test results may also be used to benchmark academic performance of their students against national peers and to set targets for improvement. Furthermore, chief academic officers may use these results to provide information to the public, funding organizations, policymakers, and parents on how their students perform academically in relationship to a national standard.

The table on the next page provides a snapshot of the results for each U. T. System institution. More specific analysis follows (pp. I-54-57)

Table I-42

Collegiate Learning Assessment Scores for U. T. Academic Institutions

Freshmen	Measure	National Expected Score	Expected Institution Score	Actual Institution Score	Actual Senior Performance Relative to Expected Performance	National Comparison
UTA	Performance Task Analytic Writing Task	22.5 22.9	22.64 22.81	22.5 22.0		As expected As expected

	Analytic Writing Task	27.3	27.71	28.4	0.69	As expected

Note: Senior level data were not available for U. T. Brownsville and U. T. Permian Basin.

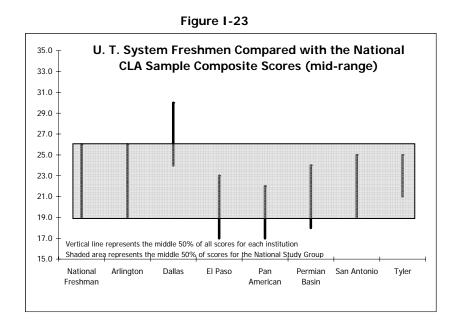

Source: U. T. System Office of Academic Affairs

Composite Scores: Comparing U. T. System and National Results.

- Combining results on all of the CLA questions, given similar levels of preparation (based on the ACT-equivalent scores), U. T. System academic institution freshmen and seniors scored as well or better than students at institutions around the nation.
- Freshmen from U. T. Dallas scored quite significantly higher than the national sample.
- U. T. System institution seniors from U. T. Austin and U. T. Dallas scored much higher than the national sample.
- These results are extraordinarily important for the U. T. System and the state. Compared with significantly lower scores at many institutions in other parts of the country, it appears that freshmen and seniors in the U. T. System are holding their own or exceeding national standards for problem solving, critical thinking, and writing.
- With a single year of results, it is too soon to find causal relationships among these results and other measures of student outcomes, like engagement and satisfaction. However, with another year or more of test scores, the U. T. System institutions will have information to compare and correlate trends in student engagement and postgraduate experience.

<u>Freshmen Composite Scores</u>. Figure I-23 compares the mid-range performance, or problem-solving, scores (middle 50% of all scores) for freshman at U. T. System institutions with the mid-range scores of all national test-takers.

- U. T. Dallas freshmen scored well above the national sample.
- U. T. Arlington, U. T. San Antonio, and U. T. Tyler freshmen scored within the national norm.
- Many U. T. El Paso, U. T. Pan American, and U. T. Permian Basin freshmen were within the national norm, but the lower end of their ranges were below the national norm.
- Freshmen did not take the test in sufficient numbers at U. T. Austin and U.T. Brownsville to provide a significant sample for this analysis.

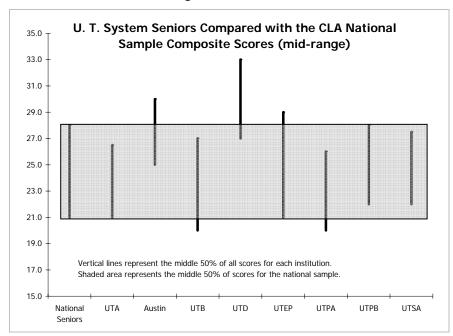

<u>Senior Composite Scores</u>. Senior students at U. T. System institutions scored even better compared with the national sample than did freshmen (Figure I-24).

- Seniors at U. T. Austin and U. T. Dallas performed better than the national group.
- Seniors at U. T. El Paso slightly exceeded the national norm at the top of the range.
- The mid-range of scores at U. T. Permian Basin and U. T. San Antonio fell almost entirely in the mid-range of national scores.
- At U. T. Pan American and U. T. Brownsville/TSC, senior scores were largely within the mid-range of national scores, but were slightly lower at the bottom end of the range.
- U. T. Tyler did not have a large enough sample to make a significant comparison.

Senior "performance task" (problem solving) scores.
U. T. System institution seniors scored at expected or higher levels, compared with the national sample, on the CLA performance task – problem solving, analytical reasoning, and critical thinking (Figure I-25).

- U. T. San Antonio seniors scored significantly higher than expected, relative to the national sample.
- The mean scores for seniors at U. T. Pan American and U. T. Dallas scores were higher than 50 percent of the deviation scores of the national sample.
- U. T. Austin, U. T. Arlington, and U. T. El Paso seniors

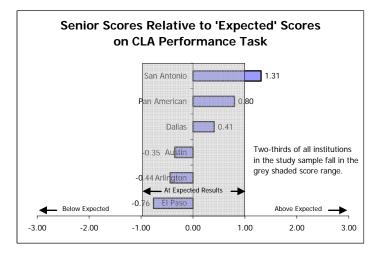

Figure I-24

scored within, but in the lower half of, the expected deviation range.

 U. T. Brownsville/TSC, U. T. Permian Basin, and U. T. Tyler did not have a sufficient number of tests takers for this analysis.

Figure I-25

Comparison on the writing tasks.

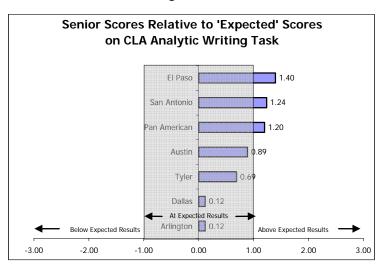

These tasks seek to measure the ability to make an argument, critique an argument, and write analytically. All U. T. System institutions performed as well or better than the national sample in the development of analytic writing skills (Figure I-26).

- The mean score for seniors at U. T. El Paso, U. T. San Antonio, and U. T. Pan American was significantly higher than the national mean, and at the high end, exceeded expected results.
- The mean score for seniors at U. T. Austin and U. T. Tyler was higher than 50 percent of the national sample deviation scores.
- The scores for seniors at U. T. Dallas and U. T. Arlington were slightly above 50 percent of the national results.

Adding value. The majority of U. T. System institutions add value to student learning at expected or even higher levels. The CLA measures this by comparing the difference between seniors' scores relative to the national group, with the freshmen scores relative to the national sample (Figure I-27).

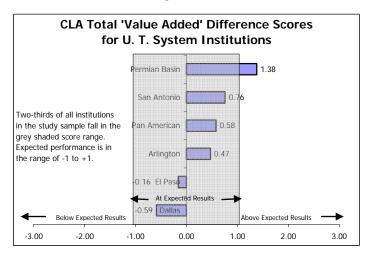

- At the top of its range, the average "value-added" scores at U. T.
 Permian Basin exceeded two-thirds of the national sample, suggesting a significant difference in learning between the freshman and senior years.
- There was also a positive difference in the "value-added" scores at U. T. San Antonio, U. T. Pan American, and U. T. Arlington, and these scores fell in the upper half of the national "value-added" score range.
- At U. T. El Paso and U. T. Dallas the results fell within the range of two-thirds of the national sample,

Figure I-26

but at these two institutions freshman scores were somewhat higher than senior scores; thus the "value-added" difference falls below the national median. Possible explanations for the slightly negative score might include an overrepresentation of transfer students in the senior sample or the presence of a more selective freshman class being admitted to U. T. El Paso and U. T. Dallas than past years.

Figure I-27

⁶ The analysis in this section provides inferences about the institution's contribution to student learning. Two samples are involved in this analysis: the freshmen class sample and the senior class sample. Each sample includes roughly 100 students and in some cases less. Given sample limitations and the fact that this is a preliminary study, the analysis is not intended to compare results among institutions. Although the "value added" data show interesting trends, meaningful comparisons will depend on additional testing and further study of the results, and the UT System is designing a longitudinal study for this purpose.

- U. T. System institutions add value for their students by preparing them to begin careers or enter graduate and professional study.
- Focusing on only those students who remain in Texas (because of limitations on available data) for employment or further study, the following data establish a baseline to track postgraduation experience.
- These trends will fluctuate, as employment or enrollment in graduate school is determined heavily by the economy.
- These data show that a very large proportion of U. T.
 System academic institution students – from 80 to over 90 percent – continue in graduate or professional school or are employed within one year after graduation.
- The proportion of students who are enrolled in graduate/professional school within one year after graduation has gradually increased since 2001.
- In the case of U. T. Austin, the data are limited because, in addition to students employed or enrolled in a Texas graduate program, a significant number of graduates are recruited into universities around the country or work for multinational corporations who employ them outside of Texas.
- This "out-of-state" effect also applies to other institutions.

U. T. Academic Institutions: Graduate and Professional Students

Graduate Student Preparation

- Average scores for Graduate Record Examinations for law and management provide a perspective on the preparation of students for graduate and professional school.
- These tests are among multiple predictors of success in graduate or professional school and are used by some institutions to benchmark their performance against national peers.

Table I-44

Source: U. T. System Academic Institutions.

- Over the past five years, GRE scores have increased U. T. Austin, U. T. Brownsville/TSC, U. T. Dallas, and U. T. El Paso. Between 2003-04 and 2004-05, average scores increased at U. T. Austin, U. T. El Paso, U. T. Pan American, and U. T. Tyler.
- It is important to note that many programs do not require GRE exam scores for admission.
- Average GMAT scores for 2004-05 were lower at all schools except U. T. Dallas than they were in 2000-01. However, the 2004-05 scores were higher than the previous year at U. T. Austin, U. T. Dallas, U. T. El Paso, and U. T. Permian Basin.

- Graduate and professional enrollment at U. T. System academic institutions has increased significantly – by 26 percent – from 2000 to 2004.
- Proportionately, the greatest percentage change occurred at U. T. Dallas (37 percent), U. T. Pan American (42 percent), and U. T. San Antonio (71 percent).
- But, from 2003 to 2004, enrollments increased very little, paralleling the national trend, where enrollments increased 2 percent from 2003 to 2004.

- The gender mix in the graduate and professional student headcount has remained nearly constant at most campuses during the 2000-2004 period.
- Females at U. T. Brownsville/Texas Southmost College, U. T. El Paso, U. T. Pan American, U. T. Permian Basin, U. T. San Antonio, and U. T. Tyler account for nearly or more than 60 percent of graduate and first professional students. This is in line with national trends: 58 percent of the graduate and first professional student population in 2003 was female.

• Females at U. T. Arlington, U. T. Austin, and U. T. Dallas were underrepresented when compared to the national population of graduate and first professional students.

Ethnic Composition of Graduate and Professional Students

- From 2000 to 2004, the overall proportion of non-White and international students has increased at U. T. System academic institutions except U. T. Brownsville/Texas Southmost College (see table on next page). In 2000, the overall proportion of non-White students at U. T. System academic institutions was 48.1 percent; it was 53.4 percent in 2004 (excluding students whose ethnicity or race was unknown).
- The proportion of Black graduate and professional students increased on every campus except U. T. Arlington and U. T. Tyler. Although small compared with other ethnic/racial groups, the proportion more than doubled at U. T. Brownsville/Texas Southmost College, U. T. Pan American, and U. T. Permian Basin.
- The proportion of Hispanic graduate and professional students increased at U. T. Austin, U. T. Dallas, U. T. El Paso, U. T. Pan American, U. T. Permian Basin, and U. T. San Antonio.

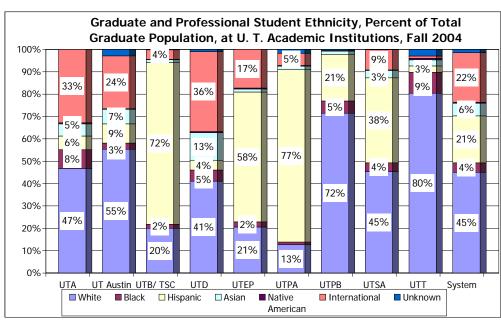

Figure I-28

- These trends parallel increases among minority graduate students nationally.
- From 2000 to 2004, enrollments of international students increased from 21.2 percent to 22.2 percent, slightly countering the national trend, where enrollments fell by 3 percent in 2004.

Total Academic I	nstitutions	7,821	8,050	8,203	8,793	9,823	25.6%

- The total number of graduate and first professional degrees conferred by U. T. System schools rose by 25.6 percent from 2000 to 2004.
- The numbers increased by over 77 percent at U. T. Arlington, over 24 percent at U. T. Dallas, 57 percent at U. T. El Paso, and nearly 25 percent at U. T. San Antonio.
- The overall decline in number of doctoral degrees conferred at U. T. Arlington, U. T. Austin, and U. T. Dallas over this period parallels the national trend.
- U. T. Arlington conferred 13 and U. T. Austin 15 more doctoral degrees in 2004 than in 2003. This
 is similar to a shift nationally, where Ph.D. degrees increased slightly in 2003 and 2004, as
 reported by NSF in November 2005 [http://www.nsf.gov/statistics/infbrief/nsf06301/].
- Increases in doctoral degrees conferred at U. T. El Paso, U. T. Pan American, and U. T. San Antonio reflect the growth in numbers of doctoral programs available to graduate students.

 Nationally, 56 percent of those students enrolled in graduate and first professional programs were female in 2003. At U. T. Brownsville/Texas Southmost College, U. T. Pan American, U. T. Permian Basin, and U. T. San Antonio, the proportion of female students earning graduate degrees was significantly higher.

Degrees Awarded by Ethnicity

- The overall proportion of graduate and professional degrees awarded to non-White students increased from 2000 to 2004 (see Table I-50). From 2000 to 2004, more non-White students received graduate and professional degrees at each U. T. System academic institution except U. T. Brownsville/TSC, U. T. Permian Basin, and U. T. Tyler.
- As shown on the following pages, U. T. System institutions are noted nationally for the numbers of minority students receiving graduate and professional degrees.

Percent of Graduate and First Professional Degrees Conferred to Non-Whites at U. T. Academic Institutions, 2000 and 2004 100% 88% 81% 83% 80% 60% 41% 40% 20% 0% UTA UTB/ UTD UTEP UTPA UTPB UTSA System □ 2000 ■ 2004 Austin TSC

Figure I-29

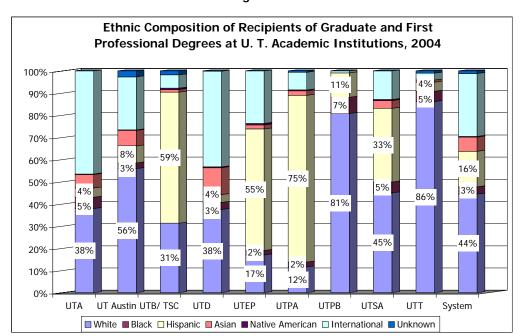

Figure I-30

- Nationally, in 2003, 6.6 percent of all Ph.D.s were awarded to Black students, and 4.9 percent to Hispanic students, according to a 2005 report by the Woodrow Wilson National Fellowship Foundation. These data represent steady, but very small increases over the past two decades, and underscore the persistent underrepresentation of Black and Hispanic doctoral recipients.
- Between 2000 and 2004, the proportion of graduate and professional degrees awarded to White students by U. T. System academic institutions decreased by 10 percentage points to 44 percent, less than half of all degrees conferred, compared with the national average of 59.9 percent in 2003-04.
- The proportion of graduate and first professional degrees awarded to Hispanic students increased at U. T. Arlington, U. T. Austin, U. T. Dallas, U. T. El Paso, U. T. Pan American, U. T. San Antonio, and U. T. Tyler. The average for U. T. System academic institutions was 16 percent, compared with 4.6 percent nationally.
- During the same period, the percent of graduate and first professional degrees awarded to Black students increased at U. T. Austin, U. T. Dallas, U. T. Pan American, U. T. Permian Basin, and U. T. San Antonio. This reverses the trend from previous years, when the overall proportion was declining slightly.
- Over the period 2000 to 2004, the largest increase has been a 6 percentage point rise of international students receiving graduate and first professional degrees.
- At the master's level, six U. T. System academic institutions ranked nationally among the top 100 schools in awarding the master's degrees to Hispanic students during 2003-04 (*Black Issues in Higher Education*, July 2005).
 - U. T. El Paso 5
 - U. T. Pan American 9
 - U. T. San Antonio 17
 - U. T. Austin 20
 - U. T. Brownsville/Texas Southmost College 60
 - U. T. Arlington 72

- Among institutions awarding master's and first professional degrees to Hispanic students, U. T. System institutions rank in the top ten in many specific fields, and first in several:
 - U. T. Austin area studies (4), business (8), engineering (8); English language and literature (5), law (5).
 - U. T. El Paso biology (1, tie); business (7); computer and information sciences (8); education (6); engineering (5); English language and literature (2); mathematics (2); physical sciences (1).
 - U. T. Pan American education (9); health professions (8).
 - U. T. San Antonio biology (1, tie); mathematics (1).
- Nationally, U. T. System academic institutions are ranked highly among those conferring doctoral degrees to Hispanic students.
 - U. T. Austin 5th in doctoral degrees in all fields to Hispanic students; 10th in business and management to all minority students; 2nd in education degrees to Hispanic students and 7th for total minority students; 6th in engineering; and 8th in social sciences.
 - U. T. Arlington tied for 3rd in doctoral degrees in mathematics awarded to all minority students.

Pharmacy North American Pharmacists Licensing Examination (NAPLEX)	99.1	98.2	100.0	99.0	93.6			

Percentage of initial test takers who pass all parts either before graduation from the program or within the twelve months immediately following graduation from the program.

Source: Legislative Budget Board

Law

- Over the past five years, the pass rate of U.T. Austin law students has decreased slightly from 93.9 to 92.6 percent.
- *Hispanic Business* ranked U. T. Austin's law school number one in the nation for Hispanic students in 2003 and 2004.

Pharmacy

- There is a growing demand for pharmacists in Texas, in surrounding states, and nationally. Competition from the retail sector has made it difficult for hospitals and other medical facilities to find these professionals. The joint Pharmacy degree offered by U. T. Austin in collaboration with U. T. Pan American is intended to help increase the number of pharmacists trained in Texas.
- The pass rate was 99 or 100 percent in 2000, 2002, and 2003. However, in 2004, it declined to 93.6 percent.

Contextual Measures: Graduate and Professional Degrees in High-Priority Fields

- U. T. System institutions contribute significantly to the state's pool of professionals in high-priority fields.
- It is important to track performance at the graduate and professional degree levels as well as the baccalaureate level.

Table I-52

Graduate and Professional Degrees Conferred in High-Priority Fields at U. T. Academic Institutions

^{*} Arlington's new Masters in Interdisciplinary Science awarded degrees for the first time in 2002-03.

^{**} There was a corresponding increase in the number of degrees that Arlington awarded in Computer Science Engineering, which are included in Engineering, rather than the Computer and Information Science category.

Technical fields

- In high-priority technical fields, the overall trend has been an increase in total numbers of degrees conferred by academic institutions over the period 2000 to 2004, from a System total of 1,642 to 2,467.
- This overall increase was generated largely in engineering programs at U. T. Arlington, U. T. Austin, U. T. Dallas, U. T. El Paso, and U. T. San Antonio.
- The number of degrees in computer and information sciences increased at U. T. Dallas, U. T. El Paso, U. T. Pan American, U. T. San Antonio, and U. T. Tyler.

Health fields

- The overall trend, a matter of concern to the U. T. System, has been a decrease in total numbers of degrees conferred by academic institutions in high-priority health fields from 357 in 1999 to 317 in 2002, with a modest rebound in 2003 to 334. In 2004, the total number declined slightly to 331.
- From 2000 to 2004, the number of graduate-level communication disorders degrees conferred at U. T. Pan American increased.
- The number of nursing degrees increased at U. T. Arlington (where it more than doubled from 20 to 53), U. T. Brownsville, U. T. Pan American, and U. T. Tyler (nearly doubling from 7 to 13).
- The number of rehabilitation/therapeutic services degrees conferred by U. T. Pan American also more than doubled during this period.

- The U. T. System plays an important role in building the state's supply of education professionals.
- Over the past five years, the number of students receiving graduate education degrees from U. T. System academic institutions has increased by 20 percent.
- Between 2000 and 2004, very significant proportional increases in numbers of education degrees were achieved at U. T. Arlington (91%) and at U. T. El Paso (84%). Proportional increases of over 20 percent occurred at U. T. Brownsville/TSC, U. T. Dallas, U. T. Pan American, and U. T. San Antonio.

Contextual Measure: Number of Graduate and Professional Programs

• The number of graduate and professional programs helps illustrate the scale of an institution's academic programs and scope of service to students and regions of the state.

Table I-54

	. 42.5 1 64

^{*} The Professional Program for UTPA is the cooperative doctorate in pharmacy with UT Austin.

Source: U. T. System Academic Institutions

- Expansion of graduate programs reflects the institutions' responses to growing enrollment demands and to growth in targeted areas. Numerically, this growth has been concentrated largely at the master's level, but proportionately, the number of doctoral programs has increased more.
- To leverage resources, some institutions offer programs jointly with other U. T. System institutions.
- For example, U. T. Pan American's doctoral degree in Education began as a cooperative program with U. T. Austin. Its Pharmacy program is currently a cooperative program with U. T. Austin.
- U. T. El Paso offers cooperative master's programs in Library and Information Sciences and Social Work with U. T. Austin, in Public Health with U. T. Health Science Center-Houston, and in Physical Therapy with U. T. Medical Branch. It offers cooperative doctoral programs with U. T. Austin in Border Studies and Pharmacy and with the U. T. Health Science Center-Houston in Nursing.

I. Student Access, Success, and Outcomes: U. T. Health-Related Institutions

Enrollment at U. T. Health-Related Institutions

 This measure indicates the number of undergraduate, graduate, and professional students enrolled on the 12th day of class, disaggregated by level, by school, by gender, and by ethnicity.

^{*} Includes post-baccalaureate students; decrease in Allied Health due to transition to Master's-level programs.

- Overall, undergraduate enrollments in 2004 were at the same level as in 2000.
- The increase in undergraduate nursing enrollments from 2000 to 2004 at U. T. Medical Branch, U. T. Health Science Center-Houston, and U. T. Health Science Center-San Antonio counters the statewide trend of overall reductions in nursing enrollments. However, 2004 nursing enrollments at U. T. Health Science Center-San Antonio declined compared with 2003.
- As Table I-56 shows, 80 percent of undergraduates in health-related programs are female, as they have been for the previous two years.

^{**} Decline was result of conversion of programs to Master's status.

Figure I-31

- On average, between 2000 and 2004, enrollments of White undergraduate students at U. T.
 System health-related institutions declined to 51.2 percent.
- Enrollments of Black students decreased by 3 percentage points. However, at U. T. Medical Branch, the proportion of Black students enrolled in allied health increased by more than onethird, to 11.7 percent.
- The proportion of Hispanic allied health students increased by 5.5 percentage points at U. T. Southwestern Medical Center. The proportion of Hispanic biomedical science students increased by 8.4 percentage points at U. T. Medical Branch.
- The proportion of Hispanic nursing students increased slightly at U. T. Medical Branch and U. T. Health Science Center-Houston but declined slightly at U. T. Health Science Center-San Antonio.

Graduate and Professional Enrollment

- Between 2000 and 2004, overall enrollments in graduate and professional programs have increased by 22 percent at U. T. System health-related institutions, and the pace of this change increased in the period 2002 to 2004.
- Proportionately, enrollments have increased most in allied health, biomedical sciences, and nursing. At U. T. Southwestern Medical Center, enrollments in allied health grew 185 percent in this period and 253 percent at U. T. Medical Branch.
- Graduate level nursing enrollments increased by 37 percent at U. T. Medical Branch, 15 percent at U. T. Health Science Center-Houston, and 80 percent at U. T. Health Science Center-San Antonio.

Source: Legislative Budget Board

- Licensure examination pass rates indicate the effectiveness of the institution's instructional program in preparing graduates for credentialing in certain professional fields that require licensing to practice in the state. Reports on these pass rates are required by the Legislative Budget Board.
- The rates reported here reflect the percent of students who passed the given examination on the first attempt.
- In most fields except advanced practice nursing, these pass rates are over, and in many cases, significantly higher, than 85 percent.
- Allied health exam pass rates were 100 percent in 2002-2004 for students at U. T. M. D. Anderson Cancer Center.
- In 2004, the nursing advance practice certification rate was 100 percent for students at U. T. Health Science Center-San Antonio.

Source: To	exas Higher Education (Coordina	ting Board				

- The total number of baccalaureate degrees and certificates awarded by U. T. System health-related institutions has declined from 2000 to 2004.
- It should be noted that there is a compounded national trend toward a decline in numbers of applications to health programs, together with an escalation of health professional degree requirements, for example, in allied health, which now requires master's-level degrees. This trend may lead to increased costs of education to both institutions and students.

^{*} MDACC was authorized to offer degrees in 1999, first degrees were awarded in 2001

- From 2000 to 2004, the proportion of non-White undergraduates receiving degrees from U. T. System health-related institutions increased from 37 to 45 percent.
- Over this period, health-related degrees to Black students increased slightly to 9 percent.
- The proportion of Black students receiving allied health degrees almost doubled at U. T. Medical Branch and more than quadrupled at U. T. Health Science Center-San Antonio. The proportion also increased in nursing at U. T. Health Science Center-Houston and U. T. Health Science Center-San Antonio.

- Health-related degrees awarded to Hispanic students increased to 25 percent for the U. T.
 System as a whole.
- The proportion of Hispanic degree recipients increased from 0 to 20 percent in allied health at U. T. Southwestern Medical Center; increased by approximately 86 percent in allied health at U. T. Medical Branch; increased in nursing at U. T. Health Science Center-Houston; and in allied health and nursing at U. T. Health Science Center-San Antonio.
- According to the national ranking in *Black Issues in Higher Education* (July 2005), U. T. Health Science Center-San Antonio ranked 4th in health professional and clinical sciences degrees awarded to Hispanic students and 7th for total minority students in 2004.

- Between 2000 and 2004, the number of graduate and professional degrees awarded by U. T. System health-related institutions increased by 11 percent.
- This trend includes significant proportional increases in degrees awarded in allied health and public health, with more modest proportional increases in biomedical sciences, medicine, and health information systems.
- The number or graduate level nursing degrees increased slightly at U. T. Medical Branch but declined at U. T. Health Science Center-Houston and U. T. Health Science Center-San Antonio.

• The overall proportion of female graduate and professional students receiving degrees from U. T. health-related institutions has increased slightly, from 52 percent to nearly 55 percent, although the proportion varies considerably among programs.

• Graduates in allied health and nursing continue to be predominately female.

- According to the national ranking in *Black Issues in Higher Education* (July 2005), U. T. Health Science Center-Houston ranked 5th, and U. T. Health Science Center-San Antonio ranked 10th in health professional and clinical sciences master's degrees awarded to Hispanic students in 2004.
- U. T. System health-related institutions rank highly in degrees conferred to minority professional and doctoral students in 2004.
 - U. T. Medical Branch ranked 3rd in medical degrees awarded to Hispanic students and 10th for total minority students.
 - U. T. Health Science Center-Houston ranked 5th in biology doctoral degrees awarded to Hispanic students and 6th for total minority students in 2004. HSC-Houston also ranked 9th for dental doctoral degrees for African-Americans.
 - U. T. Health Science Center-San Antonio ranked 5th in medical degrees and 3rd in dental degrees awarded to Hispanic students in 2004.
 - U. T. Southwestern ranked 4th in medical degrees for total minority students.

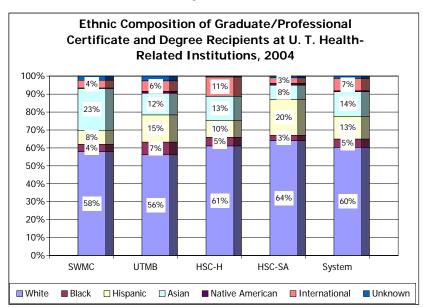

Figure I-34

- The ethnic composition of graduate and professional degree recipients has changed little from between 2000 to 2004, although the proportion of White students has declined from 65 to 60 percent.
- In 2004, 5 percent of graduates were Black, 13 percent were Hispanic, and 14 percent were Asian.
- These proportions lag the trend toward greater diversity among enrolled graduate and professional students (see Table I-61, above).

Contextual Measure: U. T. Health-Related Institution Graduation Rates

- Measuring graduation rates is one indicator of the outcomes and productivity of academic programs.
- Percentages reflect very small numbers of students in some cases.

Table I-70

	iau	ne 1-70						
Master's and Doctoral Graduation Rates at U. T. Health-Related Institutions

² Percent earning a doctoral certificate in ten or less years. Doctoral percentages do not include students who received a master's level award.

Student Outcomes: Medical Student Satisfaction

Assessing the outcomes and satisfaction of students' educational experience is an important measure of institutional success. No single survey of health-related institutions' student satisfaction exists. As a starting point, the U. T. System health-related institutions consider the results of the American Association of Medical Colleges survey of student experience.

Table I-71

Medical Student Satisfaction

These rating are based on medical school graduates' responses to the following question as part of the AAMC survey.

"Overall, I am satisfied with the quality of my medical education."

		Strongly Agree	Agree	No Opinion	Disagree	Strongly Disagree
Southwestern	2004	58.4	38.2	2.8	0.0	0.6
	2005	48.5	44.1	4.4	2.9	0.0
Medical Branch	2004	26.8	60.8	9.2	3.3	0.0
	2005	30.2	67.9	0.0	1.9	0.0
HSC-Houston	2004	28.5	56.9	9.0	4.9	0.7
	2005	27.7	58.7	5.8	7.1	0.6
HSC-San Antonio	2004	33.0	56.9	3.7	4.6	1.8
	2005	50.0	44.4	1.9	3.7	0.0

Source: U. T. System Health-Related Institutions

- Over 85 percent of graduates agreed or strongly agreed that they were satisfied with their education at U. T. System medical schools in 2004 and 2005. This percentage increased from 2004 to 2005 at three of the four medical schools.
- In 2005, more than 92 percent of graduates from U. T. Southwestern and U. T. Health Science Center-San Antonio – and more than 98 percent from U. T. Medical Branch – agreed or strongly agreed that they were satisfied.
- The 2004 and 2005 data are not strictly comparable. Survey participation was mandatory in 2004 but not in 2005. Therefore, there is the probability of bias among students who self-select to participate in the survey.

Postgraduate Experience

- U. T. System health-related institutions add value for their students by preparing them to begin careers or graduate and professional study.
- Focusing on only those students who remain in Texas (because of data limitations) for employment or further study, the following data establish a baseline to track post-graduation experience.
- These trends will fluctuate, as employment or enrollment in graduate school is determined heavily by the economy.

Table I-72

Percent of Baccalaureate Graduates from U. T. Health-Related Institutions Employed in Texas and/or Enrolled in a Texas Graduate/Professional School Within One Year							
	FY 2001	FY 2002	FY 2003	FY 2004			
Southwestern	87.4%	83.0%	82.7%	84.3%			
Medical Branch	92.9%	95.5%	93.9%	94.0%			
HSC-Houston	94.5%	97.9%	96.6%	95.3%			
HSC-San Antonio	89.7%	90.6%	89.3%	85.3%			
M. D. Anderson	NA	92.3%	100.0%	85.7%			
Source: Texas Higher Education Coordinating Board							

- These data show that a very large proportion of U. T. System health-related institution students from 80 to 95 percent – continue in graduate or professional school or are employed one year after graduation.
- The data do not account for students who are employed or in graduate/professional programs outside Texas.

Student Access, Success, and Outcomes: Implications for Future Planning and Measures for Future Development

Implications for Future Planning

- The U. T. System must continue its commitment to improve the rates of undergraduate student persistence and graduation.
- The System should make it a high priority to continue to address the decline in production of degrees in high-priority health fields.
- Addressing the relationship between ethnicity and increased student access and success must remain a priority for the U. T. System.
- Refinement and analysis of data on student learning outcomes and post-graduation experience, particularly employment trends, should be a priority.

Measures for Future Development

- Refine enrollment, persistence, and graduation rates to include first-generation freshmen.
- Refine composite persistence and graduation rates to be more complete and timely.
- Measures of affordability should be expanded, including: net cost of attendance, tuition trends, the impact of federal tax credits and deductions, and the impact of tuition increases on access and success.
- Refine undergraduate student satisfaction measures to include a measure on the teaching/learning experience.
- Expand and refine the data on and analysis of undergraduate student learning outcomes.
- Develop a methodology to assess graduate and professional student satisfaction in academic and health-related institutions.
- Develop a more complete measure of post-graduation experience for students at all levels.
