### 2006 Awards Program

The Awards and Recognition Committee met in April to evaluate entries. A description of the awards and the recipients of each are shown below. The awards were conferred at the CSHEMA Awards Luncheon in July.

The **Distinguished Service to Safety Award** is the highest individual honor bestowed upon a member of the National Safety Council. It recognizes those who exemplify outstanding individual contributions to the goals and activities of the Campus Safety Health and Environmental Management Division, to a company or organization, to the community and to other organizations engaged in related safety and health activities. It is designed to recognize and reward outstanding accomplishments of long-term service.

The **Honorary Life Membership Award** recognizes members who have made significant, meaningful contributions to safety, health or the environment that can no longer serve in a fully active capacity.

The **Complete Safety Program Award** motivates members to strive for excellence in designing and implementing safety programs that incorporate novel and/or germane techniques while still meeting regulations. Honorees must meet rigorous criteria and are worthy of national recognition.

The **Unique or Innovative Program** recognizes creative problem-solving that offers solutions to difficult challenges that are unique to the campus and can be easily adapted by other institutions. Judging criteria include problem identification, implementation method, cost effectiveness and solution relevance.

The **Newsletter Award of Excellence** recognizes both on-campus and off-the-job general safety and/or laboratory safety newsletters intended for faculty, staff, students and/or a combination of these readers.

CSHEMA's **Homepage Competition** honors web page design that expertly and consistently supports its institution's image and goals by successfully incorporating accessibility, timely and relevant editorial content, and a wide scope of quality features and resources. Winning home pages represent the absolute best work in the field.

The **Perks for Peers Program** promotes interest in and encourages development of innovative programs that improve fire and life safety awareness at colleges and universities. This \$2000 monetary award has been made possible through the generosity of
