Information Resources: Central IT for UTD

Information Resources offers central Information Technology services to the UTD community. IR is continuing its evolution and reorganization under the [Vice President and Chief Information Officer](#) office established by UTD President Dr. Daniel in February 2007. Further updates will be noted on this page as the department solidifies its structure. Continuity of service delivery has been a cornerstone of the ongoing transition, which is envisioned to be completed in the first quarter of 2007.

Microsoft Windows Vista

Microsoft Vista (XP replacement) is commercially available. While this is exciting news, the initial product release has several critical problems that may cause PCs to no longer function correctly on the campus network. Please check out this link for details - www.utdallas.edu/ir/vista

Academic Computing Services

Information Resources

- Help Desk
- Quick Guide to Computing Services
