

Information Resources

The University of
Texas at Dallas

Introduction

The  departmental team of eLearning professionals within Information Resources formed to help meet the needs of faculty, staff, and students on and off campus. The team consists of two primary and one secondary system administrators who are responsible for supporting, maintaining, and developing the campus course management system, WebCT; and two Instructional Technologists who are responsible for customer support, communication, and education. Our primary responsibilities are to ensure the functionality of the campus course management system, WebCT, and to help faculty effectively use technologies such as WebCT to enhance their classes. The team also works with the UTD Helpdesk to provide customer support for WebCT, Respondus, and other eLearning products on the campus.
