

Encryption

UT System has issued a [Security Practice Bulletin #1 \(SPB-1\)](#) that has the authority of a policy. This bulletin establishes encryption as a requirement for storage of Confidential University data on portable as well as non-university owned computing devices.

The practice bulletin can be found on the UTD Information Security Policy page along with a [Frequently Asked Questions](#) document. Additional questions can be directed to the Information Security Office: infosecurity@utdallas.edu.

Information Security is starting a pilot project to test a product that will satisfy the requirements of this new policy.

Additional information on the pilot project will be posted here as it becomes available.
