

Course GIS 7366: Applied Remote Sensing
Professor Dr. Fang Qiu
Associate Professor in GIS and Remote Sensing
Term Fall, 2009
Meetings Tuesday 4:00-6:45 PM, GR3.602

Professor's Contact Information

Office Phone 972-883-4134
Office Location GR 3.203
Email Address Fang.Qiu@utdallas.edu
Office Hours Tuesday 3:00 – 4:00 PM
Teaching Assistant Caiyun Zhang, (GR 3.414, zhangcy@utdallas.edu)
Office Hours (Monday 4 – 6 pm, Saturday 3-5 pm)
Other Information I use eLearning for this class. Please contact me through eLearning email for all class related issues.

General Course Information

Pre-requisites, Co-requisites, & other restrictions Having taken or taking Introduction to Remote Sensing is required, or upon the approval of the instructor.

Course Description

The course covers the application of remote sensing technology to the study of the Earth's environments. The course starts with review of the remote sensing fundamentals, including remote sensing data collection and processing, electromagnetic radiation principles and energy-matter interaction, followed by introduction to various remote sensing systems, such as aerial photography, visible and near infrared (VNIR) and short wave infrared (SWIR), thermal infrared (TIR), radio detection and ranging (RADAR) systems, and light detection and ranging (LIIDAR). The second part of the course is oriented towards discussions pertaining to the applications of remote sensing technology to understanding, managing and protecting Earth resources and environment. This includes remote sensing applications to water, vegetation, urban landscape, and geological studies. The laboratory designed for the course provides a hand-on experience with spectral characteristics of natural materials, analog and digital image processing techniques, and their application in characterizing land use - land cover.

Learning Outcomes

Upon completion of the class, students will be able to:

- *Discuss electromagnetic spectrum as applied to remote sensing.*
- *Explain how different portions of the electromagnetic spectrum can be used in environmental remote sensing and discuss different orbital and sub-orbital remote sensing platforms.*
- *Digitally process optical and radar remote sensing data and extract initial statistics and thematic information from these data.*
- *Use optical and radar remote sensing data to examine aspects of the environment including water, vegetation, urban landscape, and geological materials.*

Required Texts & Materials

- Jensen, John R., 2007, *Remote Sensing of the Environment: A Earth Resource Perspective*, 2nd Ed., Upper Saddle River, NJ: Prentice Hall, 592 pages. ISBN: 0-13-188950-8

Suggested Texts, Readings, & Materials

- Jensen, John R., 2005, *Introductory Digital Image Processing*, 3rd Ed., Upper Saddle River, NJ: Prentice Hall, 544 pages, ISBN: 0131453610
- Aronoff, Stan, 2005, *Remote Sensing for GIS Managers*, Readlands, CA, ERSI Press, 487 pages, ISBN: 1-58948-081-3
- Lillesand, T.M., R. Kiefer, J.W., Chipman, 2004, *Remote Sensing and Image Interpretation*, 5th Ed. John Wiley & Sons, Inc, 763 pages, ISBN: 0-471-45153-5

Assignments & Academic Calendar

[Topics, Reading Assignments, Due Dates, Exam Dates]

Week Number	Topics, Reading and Lab Assignment
1	Remote Sensing of Environment (CH1) Introduction to the Course and eLearning Lab0: How to Use eLearning
2	Electromagnetic Radiation Principles (CH2)
3	History of Aerial Photography and Aerial Platforms (CH3) Aerial Photography – Vantage Point, Cameras, Filters, and Film (CH4)
4	Elements of Visual Image Interpretation (CH5) Lab 1. Visual Image Interpretation using Image Analysis Extension
5	Photogrammetry (CH6) Lab 2. Photogrammetry and Stereo Analysis
6	Thermal Infrared Remote Sensing (CH8) Lab 3: Forest Fire Identification with Thermal Imagery
7	Active and Passive Microwave Remote Sensing (CH9) Lab 4: SAR Image Processing
8	LIDAR Remote Sensing (CH10) Lab 5: LIDAR Data filtering and analysis
9	Midterm Examination (10/20/2009)
10	Remote Sensing of Vegetation (CH11) Application Development 1
11	Remote Sensing of Urban Landscape (CH13) Application Development 3
12	Remote Sensing of Soil, Minerals, and Geomorphology (CH14)

	Application Development 4
13	Remote Sensing of Water (12) Application Development 2
14	In Situ Reflectance Measurement (CH15) Lab 6. Use of spectroradiometer for in situ measurement
15	Project Presentation (12/1/2009)
Final Report Due	December 1, 2009

Course Policies

- Grading (credit) Criteria**
- Pop-up Quizzes and Attendance 10%
 - Labs: 30%
 - Midterm Examination: 30%
 - Application development and final Project: 30%

Make-up Exams No Make-up Exams will be given without a legitimate excuse accompanied by proper formal documentation (e.g., a doctor's excuse).

Extra Credit Will be given to optional lab works

Late Work Late submission for labs will be penalized for 1 point (out of 10) per day being late

Special Assignments TBD

Class Attendance Class attendance is required and pop-up quizzes will be given in the beginning of every class as one of means to assess class attendance. Students are expected to actively participate in class discussion.

Classroom Citizenship Please make sure you turn off your cell-phone before coming to the classroom. Viewing anything that is not related to class and communicating with other using instant messenger are prohibited during the class.

The University of Texas System and The University of Texas at Dallas have rules and regulations for the orderly and efficient conduct of their business. It is the responsibility of each student and each student organization to be knowledgeable about the rules and regulations which govern student conduct and activities. General information on student conduct and discipline is contained in the UTD publication, *A to Z Guide*, which is provided to all registered students each academic year.

Student Conduct and Discipline The University of Texas at Dallas administers student discipline within the procedures of recognized and established due process. Procedures are defined and described in the *Rules and Regulations, Board of Regents, The University of Texas System, Part 1, Chapter VI, Section 3*, and in Title V, Rules on Student Services and Activities of the university's *Handbook of Operating Procedures*. Copies of these rules and regulations are available to students in the Office of the Dean of Students, where staff members are available to assist students in interpreting the rules and regulations (SU 1.602, 972/883-6391).

A student at the university neither loses the rights nor escapes the responsibilities of

citizenship. He or she is expected to obey federal, state, and local laws as well as the Regents' Rules, university regulations, and administrative rules. Students are subject to discipline for violating the standards of conduct whether such conduct takes place on or off campus, or whether civil or criminal penalties are also imposed for such conduct.

The faculty expects from its students a high level of responsibility and academic honesty. Because the value of an academic degree depends upon the absolute integrity of the work done by the student for that degree, it is imperative that a student demonstrate a high standard of individual honor in his or her scholastic work.

Academic Integrity

Scholastic dishonesty includes, but is not limited to, statements, acts or omissions related to applications for enrollment or the award of a degree, and/or the submission as one's own work or material that is not one's own. As a general rule, scholastic dishonesty involves one of the following acts: cheating, plagiarism, collusion and/or falsifying academic records. Students suspected of academic dishonesty are subject to disciplinary proceedings.

Plagiarism, especially from the web, from portions of papers for other classes, and from any other source is unacceptable and will be dealt with under the university's policy on plagiarism (see general catalog for details). This course will use the resources of turnitin.com, which searches the web for possible plagiarism and is over 90% effective.

Email Use

The University of Texas at Dallas recognizes the value and efficiency of communication between faculty/staff and students through electronic mail. At the same time, email raises some issues concerning security and the identity of each individual in an email exchange. The university encourages all official student email correspondence be sent only to a student's U.T. Dallas email address and that faculty and staff consider email from students official only if it originates from a UTD student account. This allows the university to maintain a high degree of confidence in the identity of all individual corresponding and the security of the transmitted information. UTD furnishes each student with a free email account that is to be used in all communication with university personnel. The Department of Information Resources at U.T. Dallas provides a method for students to have their U.T. Dallas mail forwarded to other accounts.

Withdrawal from Class

The administration of this institution has set deadlines for withdrawal of any college-level courses. These dates and times are published in that semester's course catalog. Administration procedures must be followed. It is the student's responsibility to handle withdrawal requirements from any class. In other words, I cannot drop or withdraw any student. You must do the proper paperwork to ensure that you will not receive a final grade of "F" in a course if you choose not to attend the class once you are enrolled.

Student Grievance Procedures

Procedures for student grievances are found in Title V, Rules on Student Services and Activities, of the university's *Handbook of Operating Procedures*.

In attempting to resolve any student grievance regarding grades, evaluations, or other fulfillments of academic responsibility, it is the obligation of the student first to make a serious effort to resolve the matter with the instructor, supervisor, administrator, or committee with whom the grievance originates (hereafter called "the respondent"). Individual faculty members retain primary responsibility for assigning grades and evaluations. If the matter cannot be resolved at that level, the grievance must be submitted in writing to the respondent with a copy of the respondent's School Dean. If the matter is not resolved by the written response provided by the respondent, the student may submit a written appeal to the School Dean. If the grievance is not resolved by the School Dean's decision, the student may make a written appeal to the Dean of Graduate or Undergraduate Education, and the dean will appoint and convene an Academic Appeals Panel. The decision of the Academic Appeals Panel is final. The results of the academic appeals process will be distributed to all involved parties.

Copies of these rules and regulations are available to students in the Office of the Dean of Students, where staff members are available to assist students in interpreting the rules and

regulations.

Incomplete Grades

As per university policy, incomplete grades will be granted only for work unavoidably missed at the semester's end and only if 70% of the course work has been completed. An incomplete grade must be resolved within eight (8) weeks from the first day of the subsequent long semester. If the required work to complete the course and to remove the incomplete grade is not submitted by the specified deadline, the incomplete grade is changed automatically to a grade of F.

The goal of Disability Services is to provide students with disabilities educational opportunities equal to those of their non-disabled peers. Disability Services is located in room 1.610 in the Student Union. Office hours are Monday and Thursday, 8:30 a.m. to 6:30 p.m.; Tuesday and Wednesday, 8:30 a.m. to 7:30 p.m.; and Friday, 8:30 a.m. to 5:30 p.m.

The contact information for the Office of Disability Services is:
The University of Texas at Dallas, SU 22
PO Box 830688
Richardson, Texas 75083-0688
(972) 883-2098 (voice or TTY)

Disability Services

Essentially, the law requires that colleges and universities make those reasonable adjustments necessary to eliminate discrimination on the basis of disability. For example, it may be necessary to remove classroom prohibitions against tape recorders or animals (in the case of dog guides) for students who are blind. Occasionally an assignment requirement may be substituted (for example, a research paper versus an oral presentation for a student who is hearing impaired). Classes enrolled students with mobility impairments may have to be rescheduled in accessible facilities. The college or university may need to provide special services such as registration, note-taking, or mobility assistance.

It is the student's responsibility to notify his or her professors of the need for such an accommodation. Disability Services provides students with letters to present to faculty members to verify that the student has a disability and needs accommodations. Individuals requiring special accommodation should contact the professor after class or during office hours.

The University of Texas at Dallas will excuse a student from class or other required activities for the travel to and observance of a religious holy day for a religion whose places of worship are exempt from property tax under Section 11.20, Tax Code, Texas Code Annotated.

Religious Holy Days

The student is encouraged to notify the instructor or activity sponsor as soon as possible regarding the absence, preferably in advance of the assignment. The student, so excused, will be allowed to take the exam or complete the assignment within a reasonable time after the absence: a period equal to the length of the absence, up to a maximum of one week. A student who notifies the instructor and completes any missed exam or assignment may not be penalized for the absence. A student who fails to complete the exam or assignment within the prescribed period may receive a failing grade for that exam or assignment.

If a student or an instructor disagrees about the nature of the absence [i.e., for the purpose of observing a religious holy day] or if there is similar disagreement about whether the student has been given a reasonable time to complete any missed assignments or examinations, either the student or the instructor may request a ruling from the chief executive officer of the institution, or his or her designee. The chief executive officer or designee must take into account the legislative intent of TEC 51.911(b), and the student and instructor will abide by the decision of the chief executive officer or designee.

Off-Campus

Off-campus, out-of-state, and foreign instruction and activities are subject to state law and University policies and procedures regarding travel and risk-related activities.

Instruction and Course Activities Information regarding these rules and regulations may be found at http://www.utdallas.edu/BusinessAffairs/Travel_Risk_Activities.htm. Additional information is available from the office of the school dean.

These descriptions and timelines are subject to change at the discretion of the Professor.
