

Course Syllabus

Course Information

Course Number/Section

NANO 3301

Course Title

Introduction to Nanoscience and Nanotechnology

Term

Spring 2013

Days & Times

TU-TR; 10:00-11:15

Location

ECSN 2.110

Professor Contact Information

Professor

Manuel Quevedo

Office Phone

972-883-5714

Other Phone

Email Address

mqueved@utdallas.edu

Office Location

RL 3.710

Office Hours

MON. 14:00 – 16:00 PM

Other Information

Course Pre-requisites, Co-requisites, and/or Other Restrictions

Same as NANO 3302 (Characterization and Nanotech Instrumentation) and associated prerequisites, or by permission.

CHEM 1311 General Chemistry I

MATH 2417 Calculus I

MATH 2419 Calculus II

PHYS 2325/3341 Mechanics and Heat /Physics for Bio Science I

PHYS 2326/3342 Electromagnetism & Waves/Physics for Bio Science II

Course Description

Introduction to the underlying principles and applications of the emerging field of Nanotechnology and Nanoscience. Intended for a multidisciplinary audience with a variety of backgrounds.

Introduces tools and principles relevant at the nanoscale dimension. Discusses current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics, and energy.

Student Learning Objectives/Outcome Measures

For each topic covered in this course, you will be expected to demonstrate what you have learned as described in the following table.

The student should be able to:

<i>Objectives</i>	<i>Outcome Measures</i>	<i>Associated ABET Criteria</i>
Demonstrate a working knowledge of nanoscience/nanotechnology principles and applications	Summaries, Problem solving in Homework, Quizzes, Exams	a, j
Explain the nanoscale paradigm in terms of properties at the nanoscale dimension.	Summaries, Problem solving in Homework, Quizzes, Exams	a, b, g
Apply key concepts in materials science, chemistry, physics, biology, and engineering to the field of nanotechnology.	Summaries, Problem solving in Homework, Quizzes, Exams	a, b, d, e, k
Identify current nanotechnology solutions in design, engineering, and manufacturing.	Summaries in Homework, Quizzes, Exams	e, j
Explain the history of nanotechnology, and where the field may evolve over the next 10 to 15 years.	Summaries in Homework, Quizzes, Exams	j
Identify societal and technology issues that may impede the adoption of nanotechnology.	Summaries in Homework, Quizzes, Exams	f, h
Identify career paths and requisite knowledge and skills for career change towards nanotechnology.	Summaries in Homework, Quizzes, Exams	i

ABET Criteria

- (a) an ability to apply knowledge of mathematics, science, and engineering
- (b) an ability to design and conduct experiments, as well as to analyze and interpret data
- (c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- (d) an ability to function on multidisciplinary teams
- (e) an ability to identify, formulate, and solve engineering problems
- (f) an understanding of professional and ethical responsibility
- (g) an ability to communicate effectively

- (h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- (i) a recognition of the need for, and an ability to engage in life-long learning
- (j) a knowledge of contemporary issues
- (k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Assignments & Academic Calendar

Topics, Reading Assignments, Due Dates, Exam Dates

Week	Dates (2012)	Material	Topic	Readings/ Sections
1	1/15	Chapter 1,	Course Overview	1.1-1.7
	1/17	Appendix B	What is Nanoscience? Feynman's "There's plenty of room at the bottom"	App B
2	1/22	Chapter 2	Quantum Mechanics	2.1-2.9
	1/24		Quantum Mechanics	2.10-2.22
3	1/29	Chapter 3	Statistical Mechanics	3.1-3.11
	1/31		Statistical Mechanics	3.12-3.18
4	2/5	Notes from Instructor	Nanostructures characterization: Physical	
	2/7		Nanostructures characterization: Optical	
5	2/12		Nanostructures characterization: Electrical	
	2/14		EXAM II	
6	2/19	Chapter 4	Microscopy and Manipulation	4.1-4.8
	2/21	Chapter 5	Nanostructures: Top Down	5.1-5.4
7	2/26		Nanostructures: Top Down	5.5-5.10
	2/28	Chapter 6	Nanostructures: Bottom Up	6.1-6.5
8	3/5		Nanostructures: Bottom Up	6.5-6.9
	3/7	Chapter 7	Nanoelectronics	7.1-7.4
9	3/12-14		Spring Break – No Class	
	3/19		Nanoelectronics	7.5-7.8
10	3/21		Nanoelectronics	7.9-7.13
	3/26	Chapter 8	Molecular Electronics	8.1-8.4
11	3/28		Molecular Electronics	8.5-8.9
	4/2		Molecular Electronics	8.10-8.13
12	4/4		Molecular Electronics	8.14-8.18
	4/9		EXAM II	
13	4/11	Chapter 9	Nanostructured Materials	9.1-9.4
	4/16		Nanostructured Materials	9.5-9.8
14	4/18		Nanostructured Materials	9.9-9.12
	4/23		Nanostructured Materials	9.13-9.17
15	4/25	Chapter 10	Nanobiology	10.1-10.4

	4/30		Nanobiology	10.5-10.7
16	5/2		Nanobiology	10.8-10.11
	5/9		Final Exam	

Required Textbooks and Materials

Required Texts

Introduction to Nanoscience, S.M.Lindsay, Oxford ISBN 978-019-954421-9 (2010).

Required Materials

Items provided on eLearning website for the class

Suggested Course Materials

CD provided with book

Course Policies

- **Homework Assignments due no later than THE START OF CLASS.
No exceptions.**
- **Assignments and notes will be posted on the eLearning site for this course.**
- **Students are encouraged to work together on homework assignments.**
- **Homework may be submitted electronically.**
- **Homework must be presented in a professional, legible manner to be graded.**

Grading Policy

30% Weekly Homework/Quizzes

20% Attendance/Participation

20% Exams

30% Final Exam/Paper

General grading standard:

A+: 97-100; A: 93-96; A-: 90-92;

B+: 87-89; B: 83-86; B-: 80-82;

C+: 77-79; C: 73-76; C-: 70-72;

D+: 67-69; D: 63-66; D-: 60-62;

F: below 60

Make-up exams

Offered only under extreme circumstances, with evidence

Extra Credit

Not Available

Late Work

Not accepted

Special Assignments
Not Applicable

Class Attendance
Required, on time

Classroom Citizenship
See Below

Field Trip Policies / Off-Campus Instruction and Course Activities
Not Applicable

These descriptions and timelines are subject to change at the discretion of the Professor. The instructor may change material, course content, and course pace or item sequence at any time.

Syllabus Addendum

Student Conduct & Discipline

The University of Texas System and The University of Texas at Dallas have rules and regulations for the orderly and efficient conduct of their business. It is the responsibility of each student and each student organization to be knowledgeable about the rules and regulations which govern student conduct and activities. General information on student conduct and discipline is contained in the UTD publication, *A to Z Guide*, which is provided to all registered students each academic year.

The University of Texas at Dallas administers student discipline within the procedures of recognized and established due process. Procedures are defined and described in the *Rules and Regulations, Board of Regents, The University of Texas System, Part 1, Chapter VI, Section 3*, and in Title V, Rules on Student Services and Activities of the university's *Handbook of Operating Procedures*. Copies of these rules and regulations are available to students in the Office of the Dean of Students, where staff members are available to assist students in interpreting the rules and regulations (SU 1.602, 972/883-6391).

A student at the university neither loses the rights nor escapes the responsibilities of citizenship. He or she is expected to obey federal, state, and local laws as well as the Regents' Rules, university regulations, and administrative rules. Students are subject to discipline for violating the standards of conduct whether such conduct takes place on or off campus, or whether civil or criminal penalties are also imposed for such conduct.

Academic Integrity

The faculty expects from its students a high level of responsibility and academic honesty. Because the value of an academic degree depends upon the absolute integrity of the work done by the student for that degree, it is imperative that a student demonstrate a high standard of individual honor in his or her scholastic work.

Scholastic dishonesty includes, but is not limited to, statements, acts or omissions related to applications for enrollment or the award of a degree, and/or the submission as one's own work or material that is not one's own. As a general rule, scholastic dishonesty involves one of the following acts: cheating, plagiarism, collusion and/or falsifying academic records. Students suspected of academic dishonesty are subject to disciplinary proceedings.

Plagiarism, especially from the web, from portions of papers for other classes, and from any other source is unacceptable and will be dealt with under the university's policy on plagiarism (see general catalog for details). This course will use the resources of turnitin.com, which searches the web for possible plagiarism and is over 90% effective.

Email Use

The University of Texas at Dallas recognizes the value and efficiency of communication between faculty/staff and students through electronic mail. At the same time, email raises some issues concerning security and the identity of each individual in an email exchange. The university encourages all official student email correspondence be sent only to a student's U.T. Dallas email address and that faculty and staff consider email from students official only if it originates from a UTD student account. This allows the university to maintain a high degree of confidence in the identity of all individual corresponding and the security of the transmitted information. UTD furnishes each student with a free email account that is to be used in all communication with university personnel. The Department of Information Resources at U.T. Dallas provides a method for students to have their U.T. Dallas mail forwarded to other accounts.

Withdrawal from Class

The administration of this institution has set deadlines for withdrawal of any college-level courses. These dates and times are published in that semester's course catalog. Administration procedures must be followed. It is the student's responsibility to handle withdrawal requirements from any class. In other words, I cannot drop or withdraw any student. You must do the proper paperwork to ensure that you will not receive a final grade of "F" in a course if you choose not to attend the class once you are enrolled.

Student Grievance Procedures

Procedures for student grievances are found in Title V, Rules on Student Services and Activities, of the university's *Handbook of Operating Procedures*.

In attempting to resolve any student grievance regarding grades, evaluations, or other fulfillments of academic responsibility, it is the obligation of the student first to make a serious effort to resolve the matter with the instructor, supervisor, administrator, or committee with whom the grievance originates (hereafter called "the respondent"). Individual faculty members retain primary responsibility for assigning grades and evaluations. If the matter cannot be resolved at that level, the grievance must be submitted in writing to the respondent with a copy of the respondent's School Dean. If the matter is not resolved by the written response provided by the respondent, the student may submit a written appeal to the School Dean. If the grievance is not resolved by the School Dean's decision, the student may make a written appeal to the Dean of Graduate or Undergraduate Education, and the dean will appoint and convene an Academic Appeals Panel. The decision of the Academic Appeals Panel is final. The results of the academic appeals process will be distributed to all involved parties.

Copies of these rules and regulations are available to students in the Office of the Dean of Students, where staff members are available to assist students in interpreting the rules and regulations.

Incomplete Grade Policy

As per university policy, incomplete grades will be granted only for work unavoidably missed at the semester's end and only if 70% of the course work has been completed. An incomplete grade must be resolved within eight (8) weeks from the first day of the subsequent long semester. If the required work to complete the course and to remove the incomplete grade is not submitted by the specified deadline, the incomplete grade is changed automatically to a grade of **F**.

Disability Services

The goal of Disability Services is to provide students with disabilities educational opportunities equal to those of their non-disabled peers. Disability Services is located in room 1.610 in the Student Union. Office hours are Monday and Thursday, 8:30 a.m. to 6:30 p.m.; Tuesday and Wednesday, 8:30 a.m. to 7:30 p.m.; and Friday, 8:30 a.m. to 5:30 p.m.

The contact information for the Office of Disability Services is:
The University of Texas at Dallas, SU 22
PO Box 830688
Richardson, Texas 75083-0688
(972) 883-2098 (voice or TTY)

Essentially, the law requires that colleges and universities make those reasonable adjustments necessary to eliminate discrimination on the basis of disability. For example, it may be necessary to remove classroom prohibitions against tape recorders or animals (in the case of dog guides) for

students who are blind. Occasionally an assignment requirement may be substituted (for example, a research paper versus an oral presentation for a student who is hearing impaired). Classes enrolled students with mobility impairments may have to be rescheduled in accessible facilities. The college or university may need to provide special services such as registration, note-taking, or mobility assistance.

It is the student's responsibility to notify his or her professors of the need for such an accommodation. Disability Services provides students with letters to present to faculty members to verify that the student has a disability and needs accommodations. Individuals requiring special accommodation should contact the professor after class or during office hours.

Religious Holy Days

The University of Texas at Dallas will excuse a student from class or other required activities for the travel to and observance of a religious holy day for a religion whose places of worship are exempt from property tax under Section 11.20, Tax Code, Texas Code Annotated.

The student is encouraged to notify the instructor or activity sponsor as soon as possible regarding the absence, preferably in advance of the assignment. The student, so excused, will be allowed to take the exam or complete the assignment within a reasonable time after the absence: a period equal to the length of the absence, up to a maximum of one week. A student who notifies the instructor and completes any missed exam or assignment may not be penalized for the absence. A student who fails to complete the exam or assignment within the prescribed period may receive a failing grade for that exam or assignment.

If a student or an instructor disagrees about the nature of the absence [i.e., for the purpose of observing a religious holy day] or if there is similar disagreement about whether the student has been given a reasonable time to complete any missed assignments or examinations, either the student or the instructor may request a ruling from the chief executive officer of the institution, or his or her designee. The chief executive officer or designee must take into account the legislative intent of TEC 51.911(b), and the student and instructor will abide by the decision of the chief executive officer or designee.

Off-Campus Instruction and Course Activities

Off-campus, out-of-state, and foreign instruction and activities are subject to state law and University policies and procedures regarding travel and risk-related activities. Information regarding these rules and regulations may be found at the website address given below. Additional information is available from the office of the school dean. (http://www.utdallas.edu/BusinessAffairs/Travel_Risk_Activities.htm)
