*There will be 3 Midterm Exams as well as 10 weekly Quizzes. For your Quiz average I will drop your 2 lowest Quiz grades and average the remaining 8. (Each Quiz is worth 25 points.) I will then take your Quiz average and the 3 Exams, and drop the lowest of these 4 grades. The remaining 3 grades will comprise 60% of the final semester grade. Each exam is worth 100 points, and the final is worth 200 points (2 midterms.) **Quizzes will be administered by the TA in your problem section. NOTE: All Exams will be administered in CN 1.112, including the Final Exam, unless otherwise noted. Before each Midterm Exam, there will probably be a short lecture in the classroom (CB 1.120), then we will walk over to CN 1.112 for the Exam.**

Class policies:

- Exams must be taken in pencil. It is preferable that quizzes be taken in pencil as well.
- No make-up exams are given except under extraordinary circumstances.
- **There will be short (15 min.) weekly quizzes based on the assigned homework. These will be given in your problem section and will cover the previous week's homework. (Quizzes will not be given on exam weeks.)**
- Homework will be assigned but not graded. However, it is essential that you work all problems thoroughly in order to succeed in this class. It is okay to discuss the problems with classmates, but make sure you can work them by yourself after you discuss. Homework assignments will be available on WebCT. (see **)
- I am always looking for a solution – not the answer. In other words, I want to see all steps leading to the answer. Answers without any logical support will receive very little, if any, credit.
- It is essential that you attend all lectures to be successful in this class.
- All phones and pagers must be turned off during class.

Calculators: No graphing calculators are allowed. It will, however, be assumed that you do have a scientific calculator, and that you use it where appropriate. If you don't have a scientific calculator, borrow one for the semester or buy one – they are inexpensive.
