

THE UNIVERSITY OF TEXAS AT DALLAS

## Student Health Center

The U. T. Dallas Student Health Center is interested in keeping students healthy. We provide care and treatment for acute illnesses and minor injuries for all currently enrolled U. T. Dallas students. Chronic health problems are out of the scope of practice of the Student Health Center and must be managed by a provider off campus. The function of the Student Health Center is to promote, protect, maintain and restore the health status of students. Our goal is to provide quality medical care at minimal cost. We also strive to provide health education and preventive medicine. Students may be referred for more serious problems that exceed the Center's capabilities.

**COMET CARD REQUIRED**

### What is the Student Health Center?

The Student Health Center is a service of the University providing health care to currently enrolled students who have paid their fees.

**Questions ? Please call  
972-883-2747**

Due to Federal HIPAA laws we do not transmit any health/personal information by fax or e-mail; therefore; **we cannot confirm receipt of health information (TB Test) by fax or email.**

### Emergency Numbers

**Emergency: 911**  
**UTD Police: (972) 883-2331**

### Does it cost to go to the Student Health Center?

Tuition-paying students are seen at the Student Health Center at no charge for the office visit. Nominal fees are assessed for lab work, medications and certain procedures. Payment for services is due at the time medical treatment is provided. Students are responsible for any financial obligations resulting from a referral to a private physician's office, lab, hospital, or other off campus provider, etc.

### After Hours

Students requiring medical assistance when the clinic is closed may desire to go to a private physician's office, minor emergency clinic, or hospital emergency room. **Students are responsible for all expenses incurred outside the Health Center.**
