

Introduction to Neuroscience

Course Syllabus | Fall 2021

Course Information:

Catalog #: NSC3361.002
Class Schedule: Mondays/Wednesdays
Class Times: 8:30am - 9:45am
Class Location: JSOM 2.106
Instructional Mode: Traditional Classroom (Synchronous only)

Instructor: Anna Marie Taylor, Ph.D.

Office: JO3.116 Phone: 972-883-2446 (no voice mail)

Office Hours: Either in-person JO3.116 or through MS Teams

Tuesdays & Thursdays 10:30am-12:00pm

(other days and times are available by appointment)

Email: anna.taylor2@utdallas.edu

Graduate TA: Katrina Vu- Katrina.Vu@UTDallas.edu

Undergraduate TA: Yaseen Khalilullah- Yaseen.Khalilullah@UTDallas.edu

Khaled Shihabi- khaled.shihabi@utdallas.edu

Course Description:

This is an introductory science course that explores the basic structure and function of the nervous system with emphasis on the neurophysiological processes that underlie behavior. The course includes an overview of neuroanatomy, cellular neuroscience, neuropharmacology, sensory and motor systems, cognitive neuroscience, behavioral neuroscience, and disorders of the nervous system.

Course Content:

To begin to study complex behaviors and treat neurological diseases in humans, one must first understand how the brain works. Since this is an introductory neuroscience course, we will first cover the cells of the nervous system and their physiological roles in processes such as the propagation of nerve impulses and the transfer of information between neurons. This will include a survey of basic neuroanatomy and the organization as well as the development of the nervous system. Next, we will explore how sensory systems including touch, vision, and hearing, as well as, motor systems control behavior. We will then delve deeper into emotion and motivation including drugs, sex, hunger, thirst, and sleep. Finally, we will discuss learning and memory, intelligence, psychological disorders, and language. Whenever possible, clinically relevant examples will be incorporated into lectures leading to discussions of current research. This is a lot to pack into a semester, so buckle your seatbelts!

Course Learning Objectives:

Students who complete this course should be able to:

1. Analyze the contributions of anatomical, physiological, behavioral, cell and molecular, developmental, pharmacological, and biological studies to the cross-disciplinary field of neuroscience.
2. Compare and contrast how neurons and glia cells will react in different disease states.
3. Explain how action potentials propagate along neurons, how information is transferred from neuron to neuron, and how glial cells influence these processes.
4. Predict how damage to neuro-anatomical structures will impact specific behaviors.
5. Evaluate the changes that the nervous system undergoes during typical development and how this is influenced by genes vs. the environment.
6. Describe the anatomical structures and mechanisms associated with motivation, emotion, sensation, movement, and complex behaviors at the cellular and systems levels.
7. Demonstrate how scientists create and test hypotheses to study complex behaviors, neurological diseases, and psychiatric disorders.
8. Display a basic understanding of neurochemistry and neuropharmacology as it relates to neuronal function and mental disorders.
9. Integrate pathological findings from psychology, psychiatry, physiology, and neurology with basic scientific work in the neurosciences.
10. Apply neuroscience concepts, theories, and research findings to issues in everyday life.

Course Materials:

- **Required tool:** a subscription to Top Hat Pro. To order, please visit <https://tophat.com/students/> or check with the Bookstore. Top Hat will be used for in-class polling questions and to remotely administer quizzes. Please see assessment section for details.
- **Recommended textbook:** *The Mind's Machine 3e* by Watson and Breedlove. ISBN- 9781605357300. This book is available in soft cover or as an eBook. Readings to prepare for each lecture will be assigned from this textbook. **Readings should be completed before class.** While the majority of exam questions will come from lectures, quizzes will be based on assigned chapter readings.
- **Substitute textbooks:** Several Introductory Neuroscience textbooks are available which cover similar topics as *The Mind's Machine*, including but not limited to *Brain & Behavior* and *Neuroscience- Exploring the Brain*. If you choose to use one of these substitute books or an earlier edition of *The Mind's Machine*, you are responsible for finding the corresponding chapter in your book.
- **Additional Resource:** The companion website for the textbook has free open access resources, so please take advantage of it- <https://oup-arc.com/access/watson3e>

Assessment:

In-Class Questions (50 pts): During each lecture, interactive questions will be asked using Top Hat. You shall earn full credit for every correct answer and half credited for every incorrect but attempted answer. You will also earn credit for each class you attend (in-person or virtually). For the final in-class question computation, students will earn points based on the percentage of credit earned: 50 points: 80-100%, 40 points: 60-79.9%, 30 points: 40-59.9%, 20 points: 20-39.9%, 10 points: 0.1-19.9%, 0 points: 0%. *As you only need to earn 80% to get full credit, please note there will be no makeups if you were not able to answer in time due to technical difficulties or if you missed a day even due to an excused absence.*

Readiness Quizzes (50 pts): Throughout the course, 8 readiness quizzes will be given. These quizzes will contain 10 multiple choice questions (worth 1 pt each) based on assigned chapter readings prior to lecture. Quizzes will be administered through Top Hat on quiz days. Although quizzes can be taken remotely, they should be completed by students without use of any resources including notes, textbook, and web. You will first take the quiz individually. Then, you will retake the quiz with your assigned team. On each quiz if your individual grade is at or above the minimum threshold of 5pts, then it will count for 50% of your grade and the team score will count for 50%. If you do not achieve 5pts, only your individual score will count. *As answers will be discussed in class, please note there will be no makeups for missed quizzes even for excused absences.* The points earned from your top 5 readiness quizzes will be counted. **The quiz points will be added to the In-class Questions points, which can be dropped as the lowest exam grade.**

Exams (400 pts): There will be three exams during the course, which will cover the material from the section preceding the exam, plus a comprehensive final exam. Each exam will be worth 100 pts and will consist of multiple-choice, click-on, and short answer questions. Material covered on the exams will be taken mostly from class lectures, as well as any additional material provided. All exams will be given at the UTD testing center over at least a 3-day period. You are required to make an appointment with the UTD testing center at least 72 hours prior to the scheduled exam end time: <https://ets.utdallas.edu/testingcenter>. You will need to bring only your Comet card. **Missed exams may be made up by taking the final, which can be counted twice to drop the lowest exam.**

Grading Scale:

This course uses a point system. Your final grade in the course will be calculated based on the points you earn throughout the semester, as follows:

A+: 485-500+ pts, A: 465-484.9 pts, A-: 450-464.9 pts, B+: 435-449.9 pts, B: 415-434.9 pts, B-: 400-414.9 pts, C+: 370-399.9 pts, C: 340-369.9 pts, C-: 300-339.9 pts, D: 250-299.9 pts, F: 0-249.9 pts

Note: Students must earn their grades. **No** bonus point opportunities will be given to individual students and no scores will be rounded up (**not** even by 0.1 pts), so please do **not** make an awkward situation by asking.

Academic Integrity:

Academic Dishonesty including but not limited to cheating on exams and sharing or posting exam questions (with or without the correct answers) will not be condoned in my class or at UTD. Any action deemed as potential academic dishonesty will be reported to the Office of Community Standards and Conduct for official review.

Class Attendance:

Regular and punctual class attendance is expected. Students who fail to participate in class regularly are inviting scholastic difficulty. In addition to attending the in-person class in the lecture hall, all students will have the option to fully participate in lectures remotely through MS Teams during the regularly scheduled class period. Your class participation will strongly be reflected in the grade you earn.

The ability to participate remotely is intended to accommodate students during de-densification or who are feeling unwell. Please do NOT come to class in-person if you are showing signs of COVID-19, have tested positive, or have been exposed to COVID-19 until you have been cleared by UT Dallas to attend class: [Self-Reporting Form](#).

Classroom De-densification:

For the first three weeks of the fall semester (until Sept. 10th, 2021), in-person courses will be taught at a lower density. If ***your last name begins with A-M***, you are encouraged to come to in-person class on Mondays and to attend class remotely through MS Teams on Wednesdays. If ***your last name begins with N-Z***, you are encouraged to attend class remotely through MS Teams on Monday and to come to in-person class on Wednesday.

Classroom Safety and COVID-19:

To help preserve the University's in-person learning environment and to keep all Comets safe, **UT Dallas strongly encourages everyone on campus to wear face coverings indoors regardless of vaccination status**. Texas Governor Greg Abbott's Executive Order [GA-38](#) prohibits UT Dallas from mandating vaccines and face coverings for UT Dallas employees, students, and members of the public on campus. However, I strongly encourage all students to get vaccinated and mask up as recommended by the CDC. Check the [Comets United: Latest Updates webpage](#) for the latest guidance on the University's public health measures.

All students are expected to carry out [Student Safety](#) protocols in adherence to the Comet Commitment. All Comets will be expected to complete the [Required Daily Health Screening](#). Those students who do not comply will be referred to the Office of Community Standards and Conduct for disciplinary action under the [Student Code of Conduct – UTSP5003](#).

Make-up Exams:

Missed exams will be made up by taking the final, which can be counted twice to drop the lowest exam. For students who must miss more than one exam, make-ups will be given only if you provided verifiable documentation from an authoritative source: a) you were seriously ill, or b) you were detained the day and time of the exam, or c) you made arrangements prior to the exam to attend an urgent affair. In any case, you must notify me in advance of the scheduled time of the exam via email. Otherwise, you will receive a 0. *Note:* Make-up exams will not include bonus questions.

eLearning:

The course syllabus, class lecture slides and other resources will be posted on elearning, which can be accessed using your UT Dallas NetID account on the [eLearning](#) website. Please see the course access and navigation section of the [Getting Started with eLearning](#) webpage for more information. No portion of these materials may be sold, retransmitted, reposted, duplicated or otherwise used without the express written approval of the author.

Communication: This course utilizes both in-person and online tools for interaction and communication. Grades will be posted as soon as they are available. Student emails and discussion board messages will be answered within 3 working days under normal circumstances. For every scheduled class period, an announcement will be made in eLearning, which will give you details about how that day's lecture, quiz, or exam will be conducted. In event of classroom emergencies, such as lecture cancellations for a DFW Snowpocalypse, I will send an email to all enrolled in the class.

Class recordings: After each lecture, you will be able to watch a recording of the meeting, which will be available to all students registered for this class through MS Teams. **Please note that watching recordings asynchronously is NOT a substitute for class participation.** Students are expected to follow appropriate University policies and maintain the security of passwords used to access recorded lectures. Recordings may not be published, reproduced, or shared with those not in the class, or uploaded to other online environments except to implement an approved Office of Student AccessAbility accommodation. If the instructor or a UTD school/department/office plans any other uses for the recordings, consent of the students identifiable in the recordings is required prior to such use unless an exception is allowed by law. Failure to comply with these University requirements is a violation of the Student Code of Conduct.

Technical Requirements: In addition to a confident level of computer and Internet literacy, certain minimum technical requirements must be met to enable a successful learning experience. Please review the important technical requirements on the [Getting Started with eLearning](#) webpage.

Technical support: UT Dallas provides eLearning technical support 24 hours a day, 7 days a week. The [eLearning Support Center](#) includes a toll-free telephone number for immediate assistance (1-866-588-3192), email request service, and an online chat service.

Extra help:

Supplemental Instruction (SI) is offered for this course. SI sessions are collaborative group study sessions, scheduled two times per week. Sessions are facilitated by an SI Leader, who has taken the course and received a high final grade. Attendance is voluntary. For information about the days, times, and locations of SI sessions refer to <http://www.utdallas.edu/studentsuccess/help-with-courses/supplemental-instruction/>.

Review Sessions will be held each week by our undergraduate TAs, who have previously taken the course. In these sessions, the TA's will review the lecture material presented that week and answer your question. Although these sessions are not required, students who fear they may struggle with the large amount of content that will be presented in this course are strongly encouraged to attend each week.

Individual help is also available. You are welcome and indeed encouraged to meet with me or our TAs during office hours or by appointment to go over difficult concepts, discuss learning strategies, and review exams. You must help us to help you. **Note:** the day before the test is too late for that exam...the week before the final is too late for the course...Plan ahead!

University Policies:

For detailed information about the University of the Texas at Dallas' policies and procedures, please refer to <https://go.utdallas.edu/syllabus-policies>. This website includes "Resources to Help You Succeed" in addition to the university's policies on Academic Integrity, Accommodations for Students with Disabilities, Copyright, COVID-19, Religious Holy Days, Student Grievance, and Withdrawal from Class.

If you require any accommodations or have concerns, please let Dr. Taylor know as soon as possible so that appropriate arrangements can be made.

UTD Creed: "As a Comet, I pledge honesty, integrity, and service in all that I do."

Class Schedule for NSC3361.002:

Meets Mondays/Wednesdays at 8:30am-9:45am in JSOM 2.106 and remotely through MS Teams

Date	Week	Reading	Lecture Topic
8/23	1	Syllabus/Chapter 1	Introductions and the Origins of Neuroscience
8/25		Chapter 2	Neurons and Glia
8/30	2	Chapter 2*	Neuroanatomy- Just the Basics
9/1		Chapter 13.3	Development of the Nervous System
9/6	3		No Class- Labor Day
9/8		Chapter 3	Communication within the Nervous System
9/13	4	Chapters 3*	Synaptic Transmission and Neurotransmitters
9/15		Chapters 4.1	Neurotransmitters
9/20	5	Exam 1 (9/17-9/21 UTD testing center)- Neural Foundation of Behavior	
9/22		Chapter 5	Sensation and Pain
9/27	6	Chapter 5*	Motor Control
9/29		Chapter 6	Hearing
10/4	7	Chapter 6	Balance, Taste, and Smell
10/6		Chapter 7*	Visual System
10/11	8	Chapter 7	Illusion and Perception
10/13		Exam 2 (10/13-10/16 UTD testing center)- Interacting with the World	
10/18	9	Chapter 8	Hormones
10/20		Chapter 8	Neurobiology of Sex
10/25	10	Chapter 9*	Hunger, Thirst, and Homeostasis
10/27		Chapter 10	Biological Rhythms and Sleep
11/1	11	Chapter 11*	Emotions
11/3		Chapter 11	Stress and Aggression
11/8	12	Exam 3 (11/8-11/10 UTD testing center)- Motivation and Emotion	
11/10		Chapter 4	Neuropharmacology
11/15	13	Chapter 12	Psychopathology
11/17		Chapter 13*	Learning
11/22-28			No Class- Fall Break
11/29	14	Chapter 13	Memory
12/1		Chapter 14	Higher Cognition, Attention, and Consciousness
12/6	15	Chapter 15*	Language and Lateralization
12/13		Cumulative Final (12/13-12/15 UTD testing center)- Complex Behavior	

* indicates the most likely days for **Readiness** Quizzes; however, these could be given on any day. So be **ready**!

Class Schedule is subject to change at any time in the course as needed.
 Additional readings and/or videos may be assigned throughout the semester.
