

BIOL3303.001 Syllabus

Course BIOL3303.001
Course Title Introduction to Microbiology
Professor Dr. Stefanie D. Boyd
Term Spring 2022
Meetings 9:00am-9:50am Mon/Wed/Fri
MS Teams Lecture Channel.

Professor's Contact Information

Office Phone 972-883-3588
Office Location FO 3.704B
Email Address stefanie.boyd@utdallas.edu
Office Hours Monday and Wednesday from 10:00-11:00am or by appointment
Teaching Assistant Information TBA

Course Modality and Expectations

Instructional Mode	<u>Remote until Feb. 4th</u> : Synchronous online learning at the day and time of the class. The instructor delivers the instruction at the office. Students complete the course at a distance. <u>After the 4th</u> : Tradition in-person lecture
Course Platform	When not in-person, this course will be delivered on MS Teams. Lectures will be delivered through the BIOL 3303 Lecture Channel.
Expectations	Students are expected to attend lecture synchronously. Students should contact the Professor and TAs if they cannot access the course synchronously for any reason. Recorded lectures will be posted but are meant to supplement synchronous lecture.

COVID-19 Guidelines and Resources

The information contained in the link lists the University's COVID-19 resources for students and instructors of record.

Please see <http://go.utdallas.edu/syllabus-policies>

Classroom Conduct Requirements Related to COVID-19

This course will be taught remotely; however, when on campus please follow UT Dallas guidelines. UT Dallas requires that all students wear a face covering that covers the nose and mouth in all university buildings and classrooms. Anyone entering a UT Dallas building without a face covering will be asked to put one on or leave. Students should also be sure they are at least six feet away from their fellow students and faculty at all times. Students who either refuse to wear face coverings appropriately or to adhere to social distancing protocols may face disciplinary action for [Student Code of Conduct](#) violations. Students who are unable to comply with the university policies including

wearing a face covering should consult the [Comets United](#) webpage for further instructions.

Students who have tested positive for COVID-19 or may have been exposed should not enter university buildings and should instead follow required disclosure notifications as posted on the university's website (see "[What should I do if I become sick?](#)" webpage)

Class Attendance

Regular and punctual class attendance is expected. Students who are unable to attend and access the course synchronously must notify the Professor and TAs. Lectures will be recorded and posted on eLearning after class time. Due to the breadth of the material, students who fail to attend class or view recorded lectures regularly are inviting scholastic difficulty. Disruption of synchronous lectures and the posting of inappropriate comments will not be tolerated and students caught doing so may face disciplinary action for [Student Code of Conduct](#) violations.

Class Participation

Even though the course will be conducted remotely initially, regular class participation is expected. Students with synchronous access must participate in in-class polling questions. Students may use the Lecture channel chat to ask questions during lecture. This chat will be moderated by the TAs. The chat is reserved solely for questions about lecture. Posting any other material in the chat is not allowed and regular violation of posting material unrelated to lecture or a single time violation of posting inappropriate content will be followed by disciplinary action as per the [Student Code of Conduct](#). Participation also includes engaging in group or other activities during class or office hours that solicit your feedback on homework assignments, readings, or materials covered in the lectures. Class participation will be documented by your TAs. Successful participation is defined as consistently adhering to University requirements, as presented in this syllabus.

Class Recordings

Students are expected to follow appropriate University policies and maintain the security of passwords used to access recorded lectures. Unless the Office of Student Accessibility has approved the student to record the instruction, students are expressly prohibited from recording any part of this course. Recordings may not be published, reproduced, or shared with those not in the class, or uploaded to other online environments except to implement an approved Office of Student Accessibility accommodation. Failure to comply with these University requirements is a violation of the [Student Code of Conduct](#).

The instructor will record meetings of this course. Any recordings will be available to all students registered for this class as they are intended to supplement the classroom experience. Students are expected to follow appropriate University policies and maintain the security of passwords used to access recorded lectures. Unless the Office of Student Accessibility has approved the student to record the instruction, students are expressly prohibited from recording any part of this course. Recordings may not be published, reproduced, or shared with those not in the class, or uploaded to other online environments except to implement an approved Office of Student

AccessAbility accommodation. If the instructor or a UTD school/department/office plans any other uses for the recordings, consent of the students identifiable in the recordings is required prior to such use unless an exception is allowed by law. Failure to comply with these University requirements is a violation of the [Student Code of Conduct](#).

Class Materials

The instructor may provide class materials that will be made available to all students registered for this class as they are intended to supplement the classroom experience. These materials may be downloaded during the course; however, these materials are for registered students' use only. Classroom materials may not be reproduced or shared with those not in class or uploaded to other online environments except to implement an approved Office of Student AccessAbility accommodation. Failure to comply with these University requirements is a violation of the [Student Code of Conduct](#).

BIOL 3303.001 General Course Information

Pre-requisites, Co-requisites, & other restrictions

BIOL 2281 (Introductory Biology Laboratory) and BIOL 2311 (Introduction to Modern Biology I) and BIOL 2312 (Introduction to Modern Biology II) or their equivalents.

Course Description

Microbes (i.e. bacteria, fungi, archaea, protists, viruses) represent the most diverse and abundant set of living (and non-living) organisms on the planet. Microbes contribute to major biogeochemical processes, live in environments inhospitable to other organisms, and may comprise the majority of biomass on Earth. They can form beneficial symbioses with multicellular organisms, including humans, where they play critical roles in development, metabolism, and immunity. In contrast, many microbes adopt pathogenic lifestyles where they thrive at the expense of their multicellular hosts. Consequently, some of these microbes have become global public health concerns. This course surveys the form and function of the microbial world focusing on examples of microbes from all domains of life.

Learning Outcomes

In this course students will learn the basic principles of microbiology, including microbial cell structure and function, growth, metabolic processes, genetics, and how microbes interact with multicellular hosts. The course will emphasize modern problems and applications related to human health, including mechanisms of microbial pathogenesis, antibiotic resistance and microbiome research. The goal is for students to acquire basic knowledge about microbial structure and function and to understand how microbes affect human health and society. Learning will be assessed through exam questions utilizing various formats (for example, multiple choice, fill in the blank, short answer, essay), problem sets, and a class project.

Upon completion of this course, students should be able to:

1. Describe and analyze the following principles of microbiology: microbial cell structure and function, growth, metabolism, genetics, and interaction with multicellular hosts.
2. Apply this knowledge to design experiments and formulate hypotheses.
3. Apply this knowledge to interpret and critique primary scientific literature.

Required Text

Microbe 2nd edition. Michele Swanson, Gemma Reguera, Moselio Schaechter, and Frederick C. Neidhardt. ASM Press [ISBN: 9781555819132]. eText and rental options available on [Amazon](https://www.amazon.com).

Supplemental videos and readings will accompany some lectures. These materials will be posted on eLearning in advance of lecture. Slides will be posted on eLearning.

Assignments & Academic Calendar

[Topics, Reading Assignments, Due Dates, Exam Dates]

Date	Topic	Chapters
Jan. 19-24	L1. Introduction to class: A Microbial Planet L2. Microbial Diversity	Ch. 1 Ch. 14
Jan. 24-28	L3. Prokaryotic Cell Exterior: Envelopes L4. Prokaryotic Cell Exterior: Appendages	Ch. 2 Ch. 2
Jan. 31-Feb.4	L5. Prokaryotic Cell Interior L6. Viruses; Problem Set #1 due (5pm)	Ch. 3 Ch. 17
Feb. 7-11	L7. Fungi L8. Protists; Exam review and discussion	Ch. 15 Ch. 16
Feb. 14	Exam 1	
Feb. 16-18	L9. Microbial Growth and Division	Ch. 4
Feb. 21-25	L10. Microbial Metabolism L11. Synthesis of Building Blocks	Ch. 5 Ch. 7
Class project distributed on eLearning, will be discussed in class		
Feb. 28-Mar.4	L12. Central Dogma I L13. Central Dogma II; Problem Set #2 due (5pm)	Ch. 8 Ch. 8
Mar. 7-11	L14. Mutations and genetic exchange L15. Secretion	Ch. 10 Ch. 9
Mar.14-18	Spring Break	
Mar. 21-25	L16. Microbial stress responses L17. Motility and chemotaxis; Exam review	Ch. 12 Ch. 12
Mar. 28	Exam 2	

Date	Topic	Chapters
Mar. 30-Apr.1	L18. Microbiomes	TBA
Apr. 4-8	L19. Infection: the vertebrate host L20. Adaptive immunity and vaccination	Ch. 22 Ch. 22
Apr. 11-15	L21. Opportunistic infections: MRSA (election day) L22. Intracellular pathogens; Problem Set #3 due	Ch. 23 Ch. 24
Apr. 18-22	L23. Bacterial toxins L24. Malaria	Ch. 26 TBA
Apr. 25: Class project due on eLearning by 5pm Central Standard Time		
Apr. 25-29	L25. Viral pathogens: Herpes and Polio L26. Viral pathogens: Coronaviruses; Exam review	Ch. 26 TBA
May. 2	Exam 3	

Course Policies

Grading (credit) Criteria

3 Exams: Each worth 20% of final grade (60% total)

Content and format of exams: Each exam is cumulative but will focus primarily on the most recently covered material. Exam material will derive from course lectures and slides, class discussions, and assigned readings posted on eLearning. Study guides for each exam will be posted on eLearning in advance. Exams will be conducted on eLearning and students must complete the exam within a 24-hour period on exam day. Exams are timed (1 hour, 15 minutes) and questions will be of multiple formats (e.g. multiple choice, fill in the blank, short answer, free response).

3 problem sets: Each worth 10% of final grade (30% total)

Problem sets will be assigned at least two class periods before their due date on eLearning. Problem sets will give students an opportunity to apply knowledge learned in class and prepare students for exam questions. Questions in problems sets will be in various formats but the majority of questions will be free response.

1 class project: Worth 10% of final grade

The class project will ask you to think critically about primary scientific literature and to apply knowledge you have learned from the lectures and course readings. Additional information about the class project will be disseminated in class and posted on eLearning.

How to submit assignments. Assignments including problem sets and the class project **must be uploaded to eLearning** so that plagiarism checks can be performed. Turnitin links for assignment submission can be found in the Homework folder on eLearning. If drawings/diagrams are required, generate a digital image using PowerPoint or another program and include it in the Turnitin assignment.

Can students work together on the assignments? Yes, you may discuss the assignment; however, each of you will be graded individually, and **I expect each of you to write your own answers.**

Good writing practices. Some general rules to remember are: (1) Don't copy your classmates' writing. (2) Don't copy/paste directly from sources. Instead, synthesize information in your own words. (3) Direct quotes are not allowed, and points will be taken off if direct quotes are used. I encourage you to consult this resource: <https://www.utdallas.edu/library/plagiarism/index.html>.

Make-up Exams

Exams must be completed within the 24-hour period of exam day. Make-up exams are not allowed unless there is a documented emergency or religious holiday. Students with exam date conflicts must notify the Professor and TAs immediately.

Extra Credit

There is no extra credit for the course.

Late Work

No late assignments will be accepted. You are expected to manage your time effectively and turn the assignment in on time. Late assignments will receive a zero grade.

Special Assignments

A detailed description of the class project will be posted on eLearning and discussed in class. There are no additional special assignments available.

Class Attendance

Students are expected to be punctual and attend the in-person lecture and the streaming MS lecture on time. If you must miss lecture due to an excused reason (e.g. religious holiday, medical school interview) please notify the Professor and TAs prior to your absence. Students who cannot attend synchronous lecture due to accessibility issues (i.e. poor internet connection) should notify the Professor and TAs as soon as possible. Recorded lectures will be posted on eLearning as a resource.

Classroom Citizenship

Your phone and microphone should always be muted during lecture. If you have a question, please post it in the chat and the Professor or TAs will answer it. There will also be an opportunity at the end of lecture to ask questions via a poll. All posts on the course MS Teams channels and eLearning will be moderated and should be strictly related to course materials or issues. Participation on these platforms is not anonymous. Posting of inappropriate comments or material will not be tolerated and disciplinary action will be taken against individuals found in violation of course policies.

Comet Creed

This creed was voted on by the UT Dallas student body in 2014. It is a standard that Comets choose to live by and encourage others to do the same:

"As a Comet, I pledge honesty, integrity, and service in all that I do."

Academic Support Resources

The information contained in the following link lists the University's academic support resources for all students.

Please go to <http://go.utdallas.edu/academic-support-resources>.

UT Dallas Syllabus Policies and Procedures

The information contained in the following link constitutes the University's policies and procedures segment of the course syllabus.

Please go to <http://go.utdallas.edu/syllabus-policies> for these policies.

The descriptions and timelines contained in this syllabus are subject to change at the discretion of the Professor.
