

Syllabus-007-S23

Monday, January 16, 2023 12:17 AM

CS/SE 3377.507 Systems Programming in Unix and Other Environments

Mondays & Wednesdays 5:30-6:45pm in [GR 4.428](#)

Course Materials:

elearning.utdallas.edu (assignment submissions, grades, etc.)

utdallas.box.com/v/linux7-spr23 (slides)

~jeyv/linux7 directory in cs1.utdallas.edu (programs)

Instructor	Dr. Jey Veerasamy <i>In-person Office hours:</i> Mon & Wed 6:45-7:15pm near GR 4.428 <i>Online Office hours</i> (MS Teams utd.link/jey): Mon & Wed 1-3pm OR by appointment <i>Communication:</i> MS Teams chat (preferred) or email jeyv@utdallas.edu
TA	TBD

Course Description

CS 3377 Systems Programming in UNIX and Other Environments (3 semester credit hours)

Basic UNIX concepts, commands and utilities, organization of UNIX file system including links and access control, creating and managing UNIX processes and threads, implementing algorithms using shell scripts, basic networking concepts including socket and client-server programming, inter-process communication using pipes and signals, using a version control system to manage work, and introduction to cloud computing. Design and implementation of a comprehensive programming project is required. (Same as **SE 3377**)

Prerequisite: CS/CE 2336/2337 with a grade of C or better or equivalent.

Notes: CS 1336 (Programming Fundamentals) --> CS 1337 (Computer Science I) --> CS 2336/2337 (Computer Science II) is the sequence of programming courses offered by UT Dallas CS. So, you should have completed CS1336 & CS1337 or CS2337 in C/C++ programming and/or have a proficient programming experience with C/C++. Without prior experience in C/C++, this course will be challenging - be ready to invest additional hours for this course!

Student Learning Objectives/Outcomes

1. Ability to use Unix/Linux operating system (command line interface, shell scripting, regular expression).
2. Ability to use Unix/Linux programming environment and development tools.
3. Ability to program with Unix/Linux processes, threads, and inter-process communication facilities.
4. Ability to program with Unix/Linux file system, file input and output, and redirection.
5. Ability to develop programs for network environment (client-server model, socket programming, and cloud computing).

Required Textbooks and Materials

Both books are available online & free via [UTD Library => eBook](#) => [O'Reilly Online Learning](#) (need to login with UTD email address to access these ebooks):

1. *A Practical Guide to Linux® Commands, Editors, and Shell Programming*, 3ed.
Mark G. Sobell. Prentice Hall. © 2012. ISBN-10: 0-13-308504-X. ISBN-13: 9780133085044
Note. 4ed is also available and acceptable. This book is referred as [Sobell].
Sobell source code: <http://www.sobell.com/CR3>
<https://learning.oreilly.com/library/view/practical-guide-to/9780134774626>
2. *Advanced Programming in the UNIX® Environment*, 3e. W. Richard Stevens and Stephen A. Rago. Addison-Wesley. © 2013. ISBN-10: 0-321-63773-9. ISBN-13: 9780321637734 This book is referred as [APUE].
APUE source code: <http://www.apuebook.com/code3e.html>

TENTATIVE Academic Calendar*

Week #	TOPIC/LECTURE
1	Course Syllabus & Course Introduction <ul style="list-style-type: none"> • Prerequisite Form • Unix/Linux Introduction • First log in to cslinux1.utdallas.edu (install <u>mobaXterm</u>, teraterm, putty ...) • Simple C programming with hello.c
2	Unix/Linux Introduction & Commands <ul style="list-style-type: none"> • Learn basic Unix/Linux Commands • Simple File editing with vi editor (Sobell Ch6)
3	Unix, Linux Commands (Advanced) File Systems (Sobell Ch4) Shell (Sobell Ch5) Makefile
4	Bourne Again Shell – Bash shell (Sobell 8, 10) Shell Script Programming with bash
5	Unix/Linux System Prog & API APUE Ch01
6	Unix File Systems and IO, and API (APUE Ch03-Ch04)
7	Pointers & Memory management Test 1 @ Classroom (March 8)
8	Unix/Linux Process (APUE Ch07-Ch08)
9	Spring Break
10	Shell and Signal (APUE Ch09-Ch10)
11	Thread Programming (APUE Ch11)
12	Inter-process Communication (APUE Ch11.6 & Ch15)
13	Socket Programming (APUE Ch16)
14	Socket Programming Client-Server Concurrent Server
15	Advanced Topics: Cloud Computing, VCS (Git, Github, etc), Oracle VirtualBox Test 2 @ Classroom (May 3)

Grading Policy

Here is the standard mapping used for mapping the weighted total to letter grades in UTD. You have to earn Course credit is only given for work assigned in the course schedule. No extra work will be assigned nor will extra credit be given for any extra work performed by a student.

Tests	30%	There will be 2 tests (Test1 15% and Test2 15%) We will use Lockdown Browser in the classroom to take the tests. Each test will have ~ 50 randomly selected questions from a huge test bank. Please help to keep the tests as fair as possible - do not discuss the questions with your classmates after taking your test. There will be a few bonus questions to reduce your stress 😊
-------	-----	---

		<p>Any make-up tests will be arranged and scheduled during the same week at the discretion of the instructor. There should be a valid reason (like Dr note, official off-site event participation, etc.) for scheduling make-up tests & you need to coordinate with the instructor. All other scenarios will result in 20% penalty & the makeup test may be tougher than the regular one.</p> <p>Best way to prepare for the test will be to attend each class & pay attention, complete the activities and weekly assignments & get your doubts clarified in timely manner. No extra preparation is needed for the tests!</p>
Assignments	40%	<p>There will be weekly assignments due on Thursdays & they will have equal weightage – all of them together will contribute 40% to the final weighted grade. This high weightage indicates the importance of weekly assignments!</p> <p>Complexity level of each assignment will vary – each assignment may take several hours to complete. You are expected to start working on them as soon as they are posted so that you have "enough" time to work through the glitches, get the necessary help & still manage to submit on time. Do not expect me or the TA to rescue you at the 11th hour! Late submissions will be accepted with 10% penalty until Sunday night. If you cannot complete an assignment due to medical condition, send the Doctor note to the professor using MS Teams chat. You will be given a few additional days to complete the assignment.</p> <p>You can upload each one many times but only the final submission will be graded. If the instructor believes a student has committed an act of plagiarism, student will be referred to UTD administration directly - Review utdallas.edu/conduct/integrity & utdallas.edu/conduct/manage-dishonesty for details.</p>
Activities	30%	<p>There will be 1 or 2 activities every week (relatively simple compared to Assignments - should not take more than 1 hour each) to ensure that you are keeping up with the class content (complete tutorials at home, finish simple exercise or take online quiz etc.) You also need to complete an in-class activity in every class - bring your laptop to every class - all of them will contribute equally & together they will account for 30% of your final grade.</p> <p>Activities ensure that you are keeping up with the course - they cannot be made up after the deadline! In other words, late submissions will NOT be accepted, however 2 lowest scores will be dropped when computing the final grade, to cover common issues like car-trouble, overslept, etc. You should be able to earn full 30% if you attend all the sessions. If you cannot complete an activity due to medical condition, send the Doctor note to the professor using MS Teams chat. You will be given additional time to complete OR exempted from that activity.</p>

Here is the standard mapping used to map the weighted total to letter grades in UTD. Final grade should be earned - while I may do a few minor adjustments in the end, I do not plan to curve your weighted total.

A+ >= 97	97 > A >= 94	94 > A- >= 90
90 > B+ >= 87	87 > B >= 84	84 > B- >= 80
80 > C+ >= 77	77 > C >= 74	74 > C- >= 70
70 > D+ >= 67	67 > D >= 64	64 > D- >= 60
60 > F		

Weighted total in your gradebook shows the current weighted grade based on your graded work. For example, if you have done only 2 assignments & 2 weeks of Class work so far, current grade will be based on only those entries. So, it will continue to change throughout the semester as the items are graded.

Course & Instructor Policies

TA will be responsible for grading all the assignments & the instructor will be responsible for grading the activities

and tests. So, contact the TA directly using MS Teams chat for any grading related discrepancies for the assignments. It may not be possible to give a detailed feedback for each weekly assignment due to large number of students enrolled in our classes. If you need more details/clarification, please meet the TA/instructor online during office hours or message us using MS Teams (emails may get lost or blocked - not preferred). While almost all activities will get full points for submissions, we may randomly check the submissions and reduce the grade if your submission is not relevant to the activity.

You can use MS Teams chat to get help for weekly assignments. Include the detailed problem description & applicable error messages. Do not just say "my program does not work" and expect us to figure out everything - you need to help us to help you efficiently.

We expect to complete grading assignments (projects), weekly activities or quizzes, and tests in a week or so. However, when the schedule gets too busy, it can be as long as 2 weeks before the grades are assigned. I encourage you to click on My Grades every week and double-check your scores and ask for clarifications right away when you see something wrong.

Class Recordings

Instructor will try to record all the sessions in MS Teams so that all students can use them for future reference. If the instructor or a UTD school/department/office plans any other uses for the recordings, consent of the students identifiable in the recordings is required prior to such use unless an exception is allowed by law.

Comet Creed

This creed was voted on by the UT Dallas student body in 2014. It is a standard that Comets choose to live by and encourage others to do the same: "As a Comet, I pledge honesty, integrity, and service in all that I do."

Plagiarism has NO place in the college education! UTD policies require all the professors to forward all suspicious cases to academic disciplinary committee. No exceptions. So, do not copy the code from others & do not give your code to others.

Please review the UTD policy and guideline on Student behavior and conduct, academic honesty and integrity in <https://www.utdallas.edu/conduct/integrity/> and UTD BAIT team in <https://www.utd.edu/conduct/bait/>

Academic Support Resources

The information contained in the following link lists the University's academic support resources for all students. Please see <http://go.utdallas.edu/academic-support-resources>.

UT Dallas Syllabus Policies and Procedures

The information contained in the following link constitutes the University's policies and procedures segment of the course syllabus. Please go to <http://go.utdallas.edu/syllabus-policies> for these policies.

The descriptions and timelines contained in this syllabus are subject to change at the discretion of the Professor.
