

Course Syllabus

Course Information

<i>Course Number/Section</i>	CS 6384.003
<i>Course Title</i>	Computer Vision
<i>Term</i>	Spring 2025
<i>Class Level</i>	Graduate
<i>Activity Type</i>	Lecture
<i>Days & Times</i>	Tuesday & Thursday 11:30 AM – 12:45 PM
<i>Location</i>	ECSS 3.910
<i>Course Modality</i>	Face-to-Face

Professor Information

<i>Instructor</i>	Yunhui Guo, Ph.D.
<i>Office Phone</i>	+1 (972) 883-4203
<i>Email Address</i>	yunhui.guo@utdallas.edu
<i>Office Location</i>	ECSS 4.604
<i>Office Hours</i>	Tuesday & Thursday 10:00AM – 11:00AM

Teaching Assistant Information

<i>Teaching Assistant</i>	TBD
<i>Email Address</i>	TBD
<i>Office Location</i>	TBD
<i>Office Hours</i>	TBD

Course Pre-requisites, Co-requisites, and/or Other Restrictions

CS 5343 Algorithm Analysis and Data Structures

Course Description

Theory and practice of computer vision. Provides in-depth overview of computer vision, including geometric primitives and transformations, camera models, image features, epipolar geometry and stereo, structure from motion and SLAM, 3D reconstruction, variations of modern neural networks and various recognition problems such as object detection, semantic segmentation, and human pose estimation.

Student Learning Objectives/Outcomes

- Ability to understand geometric primitives and transformations
- Ability to understand projective geometry in camera models
- Ability to understand keypoint-based image features
- Ability to apply methods for camera calibration and camera pose estimation
- Ability to understand epipolar geometry, structure from motion and 3D reconstruction techniques
- Ability to understand principles and architectures of modern neural networks
- Ability to develop methods for various recognition problems from images and videos

Required Textbooks and Materials

Richard Szeliski. Computer Vision: Algorithms and Applications. 2011th Edition. Springer.

ISBN-13: 978-1848829343
ISBN-10: 1848829345

Richard Hartley. Multiple View Geometry in Computer Vision, 2nd Edition. Cambridge University Press, 2004. (Optional)
ISBN-13: 978-0521540513
ISBN-10: 0521540518

Textbooks and some other bookstore materials can be ordered online or purchased at the [UT Dallas Bookstore](#).

Technical Requirements

In addition to a confident level of computer and Internet literacy, certain minimum technical requirements must be met to enable a successful learning experience. Please review the important technical requirements on the [Getting Started with eLearning](#) webpage.

Course Access and Navigation

This course can be accessed using your UT Dallas NetID account on the [eLearning](#) website. Please see the course access and navigation section of the [Getting Started with eLearning](#) webpage for more information.

To become familiar with the eLearning tool, please see the [Student eLearning Tutorials](#) webpage. UT Dallas provides eLearning technical support 24 hours a day, 7 days a week. The [eLearning Support Center](#) includes a toll-free telephone number for immediate assistance (1-866-588-3192), email request service, and an online chat service.

Communication

This course utilizes online tools for interaction and communication. Some external communication tools such as regular email and a web conferencing tool may also be used during the semester. For more details, please visit the [Student eLearning Tutorials](#) webpage for video demonstrations on eLearning tools.

Distance Learning Student Resources

Online students have access to resources including the McDermott Library, Academic Advising, The Office of Student AccessAbility, and many others. Please see the [eLearning Current Students](#) webpage for more information.

Server Unavailability or Other Technical Difficulties

The University is committed to providing a reliable learning management system to all users. However, in the event of any unexpected server outage or any unusual technical difficulty which prevents students from completing a time sensitive assessment activity, the instructor will provide an appropriate accommodation based on the situation. Students should immediately report any problems to the instructor and also contact the online [eLearning Help Desk](#). The instructor and the eLearning Help Desk will work with the student to resolve any issues at the earliest possible time.

Grading Policy

Credit Distribution

- Homework (50%)
 - (10%) Homework #1
 - (10%) Homework #2
 - (10%) Homework #3
 - (10%) Homework #4
 - (10%) Homework #5
- Team Project (45%)
 - (5%) Project proposal
 - (10%) Project mid-term report
 - (15%) Project presentation
 - (15%) Project final report
- In-Class Activity (5%)

Grading Scale

- A 93 or above
- A- 90-93
- B+ 87-90
- B 83-87
- B- 80-83
- C+ 77-80
- C 70-77
- F 70 or below

Course Policies

- eLearning is the official information portal for this course. Course announcements, homework, lecture slides, assignments, and grades will be communicated via eLearning
- Final course grade will be posted in Galaxy by the Records Office
- Attendance:
 - Required for mandatory class sessions. There will be 1-point deduction for each mandatory class absence in participation score (5%). There will be zero point for class participation if the number of absences is three or more.
- If you decide to stop attending class, be sure to drop or withdraw from the course. Otherwise, you risk receiving an 'F' or 'NF' for the course.
- No additional individual assignments can be assigned for extra credit. Only assignments that are available to the entire class may count toward the course grade.

Academic integrity policy

You are expected to maintain the utmost level of academic integrity in the course, in accordance with the academic integrity policy of the Board of Regents of the University of Texas System. In particular, (a) it is your responsibility to protect your work from unauthorized access, and (b) the work you submit is expected to be your own. Academic dishonesty has no place in a university or anywhere else: it wastes our time and yours, and it is unfair to everyone else.

Regrade policy

The course staff will grade your work carefully. However, questions about grading do occasionally arise. If so, first read the solutions. If questions persist, please see the grader of that problem (come to office hours or schedule an appointment). In the interests of smooth administration and to encourage you to look at your graded work soon after it is returned, regrade requests must be made within two weeks of when the work

was returned. We reserve the rights to make regrade decisions "off-line" (i.e., not immediately at the time requested).

UT Dallas Syllabus Policies and Procedures

Please visit <https://coursebook.utdallas.edu/syllabus-policies> for other policies

Schedule

Week	Tuesday	Thursday	Deadlines
1	1/21 Introduction to Computer Vision	1/23 Geometric Primitives and Transformations	
2	1/28 3D Rotations	1/30 Camera Models	
3	2/4 Visual Rendering I	2/6 Visual Rendering II	HW1 release on 1/31, due 2/7 at 11:59PM CT
4	2/11 Keypoint Features I	2/13 Keypoint Features II	Project description release on 2/7, proposal due 2/14 at 11:59PM CT
5	2/18 Edges, Contours, and Lines	2/20 Camera Calibration and Pose Estimation	HW2 release on 2/17, due 2/24 at 11:59PM CT
6	2/25 Epipolar Geometry and Stereo	2/27 Structure from Motion and SLAM	
7	3/4 3D Reconstruction	3/6 Convolution Neural Networks I	HW3 release on 3/3, due 3/10 at 11:59PM CT
8	3/11 Convolution Neural Networks II	3/13 Recurrent Neural Networks	
9	3/18 Spring Break	3/20 Spring Break	
10	3/25 Transformers	3/27 Generative Neural Networks	Project mid-term report due 3/28 at 11:59PM CT
11	4/1 Neural Networks for 3D Data	4/3 Visual Representation Learning	HW4 release on 3/31, due 4/7 at 11:59PM CT
12	4/8 Optical Flow and Correspondences	4/10 Object Detection	
13	4/15 Semantic Segmentation	4/17 Pose Estimation of Objects, Hands and Humans	HW5 release on 4/14, due 4/21 at 11:59PM CT
14	4/22 Images and Languages	4/24 Multimodal Language Models	
15	4/29 Computer Vision in Robotics	5/1 Guest Lecture: TBD	

16	5/6 Project Presentation I	5/8 Project Presentation II	Project final report due 5/15 at 11:59PM CT
----	-------------------------------	--------------------------------	--

The descriptions and timelines contained in this syllabus are subject to change at the discretion of the Professor.

Topics

Introduction

- Introduction to computer vision

Image Formulation

- Geometric primitives and transformations
- 3D Rotations
- Camera models
- Visual Rendering

Feature Detection and Matching

- Keypoint features
- Edges, contours, and lines

3D Vision

- Camera calibration and pose estimation
- Epipolar geometry and stereo
- Structure from motion and SLAM
- 3D Reconstruction

Deep Learning

- Convolutional neural networks
- Recurrent neural networks
- Transformers
- Generative neural networks
- Neural networks for 3D data
- Neural implicit 3D representations

Recognition

- Optical flow and correspondences
- Object detection
- Semantic segmentation
- Object pose estimation
- Human and hand pose estimation
- Images and languages
- Multimodal Language Models

Application

- Robotics
