Course Description

This course introduces students to the governance and politics of Texas State and local government with a particular focus on the constitution, institutions, culture, and history that have defined Texas state government. Additionally, the course will include an exploration of the cities, counties, special districts, and local school districts that impact Texas. Local governments, in Texas, all too often get shortchanged when people think about state politics. Yet, these governments provide most of the essential services to Texans. Students will gain an understanding of the shape and pattern of Texas government and its relationship to the United States government.

Course Objectives:

- 1) To provide students with an understanding of Texas government, thus enhancing the ability of students to participate in state-level public policy issues and debates.
- 2) To inform students of the many functions of Texas state government.
- 3) To allow students to critically analyze, in a comparative setting, the various laws, programs, and services provided by the State of Texas.
- 4) To inform how political culture impacts policymaking on both the state and local level in Texas.
- 5) To inform students of the many unique aspects of Texas governmental processes and structures.

Course Format:

The class format will consist of lectures by the instructor and class participation by students. This means that students must be prepared to discuss assigned readings in class.

Assignments:

1) Exam I, Exam II and Final Exam: The material covered on exams will come from class readings and class lectures. The exams may consist of a combination of multiple-choice, essay questions and short identification.
