---

**Course Prerequisites**

Students should have previously taken either PSCI 3328 (International Relations), PSCI 4329 (Global Politics), or a course in international political economy, international security, or international organization. Familiarity with basic principles and concepts in international relations is assumed.

---

**Course Description**

This course explores how recent trends in globalization and global governance affect the use of force in international relations. Our central question is: Does globalization make countries less likely to use militarized force? The course begins with analysis of fundamental concepts in international security, with emphasis on realist, liberal, and rationalist explanations for war. The second portion of the course focuses on globalization processes within the “traditional” fields of international relations, focusing on how economic integration, democratization, and international organization affect the probability of war. The third portion of the course considers less conventional aspects of globalization, including demographic pressures, climate change, cultural integration, technological innovations, and cyber warfare. The course concludes with in-depth case studies of recent international conflicts.

---

**Student Learning Objectives**

Students will learn about:

- Fundamental concepts in international security, including major theories of why wars happen and how they can be prevented
- Empirical trends in economic, political, and other forms of globalization
- The interactions between these two phenomena, i.e., how globalization and security interact to affect the probability of interstate conflict

Students will also learn to:

- Think critically about global events and understand the origins, significance, and larger implications of those events
  - Make sense of complex theoretical arguments about and empirical analyses of global events
  - Develop the analytical tools to assess the relative merits of competing scholarly perspectives
- 

## Required Textbooks and Materials

There are two required texts, available at the usual outlets:

- Nye, Joseph and David Welch. 2012. *Understanding Global Conflict and Cooperation: An Introduction to Theory and History*. 9th edition. Longman.
- Russett, Bruce and John Oneal. 2001. *Triangulating Peace: Democracy, Interdependence, and International Organizations*. Norton.

Most of the required readings are from academic journals. Unless otherwise indicated, all of these journals are accessible through the UTD Library eJournals resources. (Go to <http://www.utdallas.edu/library/> and use the journal links on the left-hand side of the page.)

Additional readings are posted to the online course reserves, located at <http://utdallas.docutek.com/eres/coursepage.aspx?cid=1626>. See eLearning for the password.

## Course & Instructor Policies

Class participation accounts for 20% of the final grade. Attendance is mandatory. Lectures will not summarize the readings but will instead clarify and synthesize key concepts, and introduce new information not covered by the readings. We will devote a substantial amount of class time to analyzing the readings and discussing their relevance to current events. Students should be prepared to regularly contribute to the discussion. As always, quality of contributions matters more than quantity.

There are two in-class exams, each worth 30% of the final grade. There are also two writing assignments, each worth 10% of the final grade. Topics for the writing assignments will be announced in class approximately two weeks before they are due. Writing assignments must be submitted in hard copy (i.e., no email or eLearning submissions).

Students have the option of writing a 10-page book review (double spaced, 10–12pt font, 1 in. margins), which will count for 15% of the final grade and will correspondingly reduce the weight of the two in-class exams (see below). *All books must be approved by the instructor ahead of time*. Reviews of unapproved books will receive no credit. Students who wish to pursue this option must submit their book for approval by Tuesday, March 18th, at the latest. After March 18th, the book review option will no longer be available. Book reviews must be submitted in hard copy at beginning of class on April 29th.
