

# **CS5390.001 – Computer Networks**

**Fall 2016**

## **Syllabus**

### **Contact Information**

Professor: Khiem Le, Ph.D.  
Office: ECSS 3.703  
Office phone: 972-883-6217  
Email: [kvl140030@utdallas.edu](mailto:kvl140030@utdallas.edu)  
Lecture hours: Tuesdays and Thursdays, 2:30 to 3:45 PM @ECSN 2.126  
Office hours: will be posted on eLearning

TA: TBD  
Email:  
Office hours:

Note: Email is the best way to reach me, and your email must have a subject title starting with "CS5390.001". Remember to sign your email, so I know where it is coming from. That will help me respond to you sooner.

### **Course Description**

**Computer Networks** (3 semester credit hours) The design and analysis of protocols for computer networking. Topics include: network protocol design and composition via layering, contention resolution in multi-access networks, routing metrics and optimal path searching, traffic management, global network protocols; dealing with heterogeneity and scalability.  
Prerequisite: CS 5343

### **Prerequisites and Corequisites**

Prerequisite: CS 5343

### **Textbook**

Reference textbook: Computer Networking: A Top-Down Approach, 6<sup>th</sup> ed., *Jim F. Kurose and Keith W. Ross*, Addison Wesley, 2013. ISBN 978-0-13-285620-1

Additional course materials, such as assignments, sample programs, and other materials will be available as well. Please refer to the eLearning site at <http://elearning.utdallas.edu>.

## **Student Learning Objectives**

1. Ability to understand the need for and structure of the OSI, TCP/IP network models
2. Ability to design and evaluate methods for the framing messages in transmission media
3. Ability to analyze and evaluate different error detection schemes
4. Ability to understand and evaluate stop-and-wait, sliding window protocols
5. Ability to understand and evaluate multiple-access protocols
6. Ability to understand routing protocols
7. Ability to design and evaluate flow control and congestion control protocols
8. Ability to understand the various Internet protocols (TCP/IP)
9. Ability to do network programming

## **Communication**

Assignments, grades and announcements are posted on eLearning. Announcements are also emailed out to the whole class. In addition, you may also receive individual emails from me or the TA. It is your responsibility to logon to eLearning and check your UTD email to stay abreast of assignments, announcements and other information.

## **Grading**

You will be evaluated on the following elements: tests, projects and homeworks. For each of these elements, you will get a numerical score out of 100. Then your overall numerical score will be calculated as the weighted average of the element scores, using the weights below:

Test # 1 score:	30%
Test # 2 score:	30%
Project score:	25%
Homeworks score:	15%

The overall numerical score is possibly curved and then converted to a letter score, as follows. In addition, if you are borderline, I may decide, at my discretion, to bump you up based on the following criteria:

- Class attendance and citizenship
- Improvement throughout the semester

Overall numerical score (possibly curved)	Grade
≥97	A+
≥93	A
≥90	A-
≥87	B+
≥83	B
≥80	B-
≥77	C+
≥73	C

≥70	C-
≥67	D+
≥63	D
≥60	D-
Less than 60	F

### **Tests**

- Each test covers all the handouts + information given during lectures + homeworks + class discussions, up to the exam.
- Electronic devices (e.g. computers, laptops, cell phones, tablets) and backpacks will not be allowed at desks during tests
- Closed book, closed notes
- You are required to take the tests on the regular date. Exceptions to this policy are only made in very rare circumstances, typically due to unforeseen circumstances such as a medical or family emergency. All makeup exams are scheduled and given at the discretion of the instructor. They are only given to students who contact the instructor prior to the originally scheduled exam date/time, or for a justified emergency with documentation.

### **Project**

- Projects are hands-on assignments designed to help you develop deeper understanding of the material covered in class
- You will make an in-class presentation of your project
- More details will be provided in class and on eLearning

### **Homeworks**

- Homeworks are designed to help you check your understanding of the material covered in class and prepare you for the tests.
- You will have a week to do each one. All homework assignments will be submitted to eLearning.
- The homeworks score is the average of the individual assignment scores.
- Expect about 4 homeworks throughout the semester.
- No late submissions will be accepted.

### **Checkpoints**

Checkpoints are like short quizzes. During the lectures, there may be checkpoints to give you and me an instant gauge as to how well you are grasping the material. It is preferred that all checkpoint responses are electronic, where you use a personal device that can connect to the Internet and has a browser. Examples are smartphones, laptops or tablets. Checkpoints are not graded, but they are used to record attendance.

### **Class Attendance and Citizenship**

- Class attendance
  - Students who regularly attend class tend to make significantly higher grades than those who do not.
  - Attendance can be taken at any time at the discretion of the instructor
- Citizenship
  - Good citizenship, which is behavior demonstrating effort to learn and respect of other students' effort to learn
  - You are encouraged to participate in class discussions and ask questions, whether in class or out
  - Disruptive behavior in class is not tolerated.
  - You are expected to be on time and stay till the end of the lecture. If you ever need to leave early or come late, you must minimize disruption to the lecture.
- Class attendance and citizenship will be a consideration for possibly bumping you up if you are a borderline case.
- Some absences are automatically excused by the school and won't count against you. These include absences for sporting events (if you're a member of a UTD sports team) and other situations. If any of these apply to you, you have to contact me **beforehand** and we'll make arrangements for it. In addition, absences for medical reasons will be excused with documentation.

### **Issues about Grading**

Grade Dispute: Students are required to bring up any grading issue within a week of score posting.

### **Schedule (may be adjusted as needed)**

Test # 1: date is October 18.

Test # 2: date is December 6.

Projects: In-class presentations take place at regular lecture hours, towards the end of the semester.

Homeworks are assigned throughout the semester.

### **University's Policies and Procedures**

Please go to <http://go.utdallas.edu/syllabus-policies> for information on the university's policies and procedures, which include in particular:

- Student Conduct & Discipline
- Academic Integrity
- Withdrawal from Class
- Student Grievance Procedures
- Incomplete Grade Policy
- Disability Services
- Religious Holy Days

These descriptions and topics are subject to change at the discretion of the Instructor.
