Course Pre-requisites, Co-requisites, and/or Other Restrictions

The course is designed for graduate students who had already taken international business or international marketing management course.

Course Description

The course deals with economic relations in a global economy characterized by increasing interdependence of nations. Students through the foundations of neoclassic and contemporary economic theories will learn about absolute and comparative advantage of nations in international trade. The course also introduces new theories of international trade that have relevance in the current global economic situation. Students through various graphs will be able to see the impacts of trade barriers and protectionist government policies on the economic welfare of nations. Furthermore, students in this course will learn about the challenges of globalization such as global economic recession, environmental questions, child labor by multinational firms, the north-south dialogue on terms of international trade as well as the clash between multinational firms and developing countries on employment, transfer pricing and technology sharing. In addition, students through various group research and case reports will present their findings to the class.

Student Learning Objectives/Outcomes

Students upon finishing the course are expected to manage the following core issues:

1. Analysis of the international trade dynamics and its trend and direction in the global marketplace
2. Understanding the comparative advantage of trade between nations according to the theory of Ricardo and its limitations.
3. Understanding the impact of trade barriers on the welfare of a nation and how it affects the world economy

4. Recognizing the association global business expansion and the increase in income gap between the rich and poor
5. Identifying ethical issues and responsibilities of multinational firms: transfer pricing strategy, child labor practice controversies, environmental pollution and corruption

Accessing Grades

Students can check their grades by clicking "My Grades" under Course Tools after the grade for each assessment task is released.

Participation in the Discussion Topics

Students are expected to provide comments and solutions to the posted questions and problems spelled out in the provided discussion profile available on the course site. As the cases reflect the contents and the objectives of the chapters under which they are listed, you need to read the chapters thoroughly and Google for related issues published in journals in order to effectively participate in the discussion.

Participation grade will be based on your level of involvement. It is important to remember that the level of involvement will be evaluated by quality, not quantity of postings. Your posted messages as well as your dialogues with your colleagues with regard to mini-case and group projects should bear substance and depth.

Due to the large size of the class, weekly discussion topics are distributed to specific groups (see course calendar table). **Therefore only the assigned group members will participate in the discussion and participation grade will be assigned on individual basis.** However, the other class members can provide feedback and their own views in the general discussion area.

Web conference – discussions on video: a web conference discussing a video: [The World is Flat](#) (and also [The World is Flat 3.0](#)) is scheduled during the last week of the course. Participation in the conference is optional; however, you can earn bonus points that will be added to your participation grade.

Group Project

Project report Format: you can earn up to a maximum of 15% for your paper and project presentation and 5% for group peer evaluation.

Each student will be given a grade based on the outcome of group project and his/her level of participation within a group. The group project report will consist of 5 pages, double-spaced and typed. The report also should include a separate page of references used as sources in the report; at least five references excluding your book are required.

Peer evaluation should be submitted under the assignment link on the group case submission due date. Peer evaluation is based on individuals'

- a) intellectual contribution
- b) full participation and integrity
- c) creative and original ideas submitted to the group
- d) resourcefulness

Case profiles for group project are provided on the course site. Groups will be selected for case studies and report during the first week of the course. Based on the evaluation information, instructor will assign a group participation grade for each student.

The group project report should include:

- a) Problem definition/theme
- b) Literature and method/s applied to discuss and solve the problem indicated in the case
- c) Alternative solutions

- d) Conclusion, including the best solution to the problem

Groups will be assigned projects at the beginning of the class and students will be notified under Announcements. The instructor may also use a group sign-up sheet to form groups for group assignments or projects. A private discussion area will be set up on the discussion board for internal group communications. A group chat room can also be created for each group to use. A web conference system is available for use. Teams can schedule a live web conference for team work. Please see [Web Conferencing page](#) for instructions on making a reservation and other web conference information.

Assignment Submission Instructions

You will submit your group project and peer evaluation (in the required file format with a simple file name and a file extension) by using the Assignments tool on the course site. Please see the Assignments link on the course menu or see the icon on the designated page. You can click each assignment name link and follow the on-screen instructions to upload and submit your file(s). For additional information on how to submit assignments, view the [Submitting An Assignment video tutorial](#). **Please note:** each assignment link will be deactivated after the assignment due time. After your submission is graded, you may go to My Grades on the course menu and click the score link to check the results and feedback.

One group member will submit the assignment on behalf of the group and all group members will be able to view the results and feedback once it's been graded.

Online Exams (Midterm and Final)

Students will be evaluated on two timed online exams administered on the honor system. The questions for the exam will be drawn mostly from Carbaugh's text book, assigned articles and lecture notes. Mid-term and Final exam will include both multiple-choice and essay questions. In order to obtain full grade, the essays need to be analytical in nature and supported by at least two sources from referred journals or books (two sources per essay). Sample essay questions are posted on the module page. A sample test is also available for you to practice to get familiar with the testing system.

The exams will be available on the days indicated on the Schedule and instructions will be given indicating the total time allowed for completion once the exam is opened. The instructor can change the system of examination and re-evaluate the entire class if the honor system procedures do not function as expected.

The exams will be available under Quizzes and Exams link on the course menu. You can access them by clicking the link and then clicking the available exam title links. Each exam is timed and can only be accessed one time within the scheduled time window. Please read the on-screen instructions carefully before clicking "Begin". After each exam is graded and released, you may go to My Grades page and click the score link of the quiz to view your graded submission.
